## BUSINESS TURNS CORNER UPWARD, SIGNS INDICATE

Despite Unemployment Talk Facts and Figures Show This, Says Analyst

GRAPHS AND CHARTS DIG TO THE BOTTOM

Boston Expert Explains How to Read Details That Average Man Misses

A white man may look at a trail do see nothing. An Indian looks do says, "Four men—go north—st night—ride fast."

A layman may look at charts and aphs and glean nothing. A statistical looks and says, "Business is importing."

Sian looks and says, "Business is improving."

How this conclusion is reached and some of the signs read, is explained by Joseph H. Barber, statistician of the Walworth Company of Boston and assistant to the president, Howard Coonley.

"For instance," says Mr. Barber, "forward orders placed on a wide assortment of manufactures in many varied and typical industries show that business in the United States has stopped sagging and has turned appward even though there is still talk of unemployment. Strange as it may beem, employment is one of the last in reflect any recession. And to that extent this commonly accepted index is usually tardy in reporting the real current trend of business as shown by other and more reliable facts."

It is these measured facts and figures that Mr. Barber gathers from every conceivable source and has before him in the new administrative quarters in the Statler Building, Boston, of the Walworth Company

quarters in the Statler Building, Boston, of the Walworth Company which has plants here and at several other points in the West and South as well as sales headquarters in New

Signs of Good Times Ahead "Our facts," continued Mr. Bar-ber, "show that business has been formal for some months even igh no one can say just where the though no one can say just where the given line of normal may be. But conditions have not been very badly awry during the process of readjustment to a sounder basis. Here are just a few evidences of the extent of our present prosperity that persists in spite of temporary readjustments such as that of late 1927:

"The total income for 1926 reached the high point of \$90.000,000,000 according to the National Bursau of

newal of enterprise backed by orders and cash to an encouraging extent. Just as one example, the unfilled steel orders have been mounting for several months, sheet steel sales have increased, machine tool demand is at a peak, orders for structural steel are at continuing high levels and a sturdy backlog of building projects give the statistician a clue to greater construction ahead. And note that all these signs develop from renewed activity in commitments against the future.

Building on Sounder Basis "Not only do the signals indicate better business," says Mr. Barber, but the prosperity in sight is building upon a sounder basis than that of 1920. Then, the danger signals were set because production and posts had gone too far above income

New Lord Chancellor

Mussolini's Statement Regarding Hungary's Claims Viewed With Seriousness

By SISLEY HUDDLESTON BY CABLE TO THE CHRISTIAN SCIENCE MONITO PARIS-France as a friend, backer and ally of the Little Entente is perturbed by Benito Mussolini's declarations to Lord Rothermere. Italy sympathizes with the aspirations of Hungary and thinks the Trianon Treaty ought to be revised in arcordance with racial demarcations. The British official view is certainly not so imprudent, but it is believed here that certain financial interests "Savings bank accounts increased more than 50 per cent since 1920.

"College enrollment increased 110 per cent since 1920.

"Automobile registration jumped from 9,000,000 to 21,000,000 since 1920.

"Thus there is preparing an extremely strong demand for the reconsideration of the peace arrangements of central Europe. Unfortunately, whatever injustices were compatible to the constitution under which we live.

"I do not hesitate to say to your constitution and not hesi

"The radio and motion picture inmitted in 1919 cannot now be altered usered at the expense of other states. If Hungary were given the territory doubtless occupied entirely by Hungarians, then three countries, Czechoslovakia, then three country make for the midde to safety and perpetuity of our institutions."

He asserted that the Republican tout the Tri-State District, which touches upon portions of Pennsylventions. The English language will be exhausted of its adjectives by these conventions in denouncing issue in the coming campaign."

The 200,000 acres of land which the country make for the midde to safety and perpetuity of our institutions."

He asserted that the Republican tout the Tri-State District, which touches upon portions of Pennsylventions. The English language will be exhausted of its adjectives by the country make for the midden throughout that the Democratic Party in the country make for the expedition of traffic upon the country make for the midden throughout that the Democratic Party in the country make for the asserted that the Republican that the Republican that the Republican that the Democratic Rumania and Jugoslavia, would be deprived of large tracts of territory which now belong to them. It was precisely to resist such a possibility that they formed the Little Entente, and that the Little Entente was connected up with Poland. It even possesses attachments to Greece.

Revision of Treaties It is supported by France, which realises that if once treaty arrangements begin to break up, it will be difficult to keep anything of the 1919 arrangements. Moreover, though the League of Nations exists partly for the purpose of undertaking the revision of treaties, it is not likely to move in this direction while its chief supporters are the Little Entente and Connecticut Broker Says He

France, which lay stress in all their diplomatic proceedings on the necessity of the maintenance of the status

adjustment of these rival territorial, decided he wants a university racial revendications. Otherwise the conflict of claims will become extremely serious. It would be wrong ried, is going to enter Harvard Colto accept the statement of the Temps lege for four years, and then spend that treaties necessarily create two years in graduate study, he has rights. Those rights were presumed announced. to pre-exist and gave shape to the treaties. If they did not pre-exist my career," Mr. Koger said in an inthen the treaties are badly framed.

Gravity of Statement

Historica and save shape to the my career," Mr. Koger said in an interview. "If anything, what I hope to do will be a means of extending the

Gravity of Statement But even if it were admitted that in the business world. I have been the treaties were badly framed and terribly lucky and have made some are contrary to justice, it will be money, and I want to take advanage nationalisms in the present state of divided Europe. The gravity of Signor Mussolini's pronouncement is therefore underlined by the French press and plain language is used. It is even said that if there is a question of giving Hungary its dangerous to provoke and encour- tage of my good fortune. a question of giving Hungary its ethnic frontiers, then Italy, too, must have ethnic frontiers, that is to say, must lose that portion of the Adige inhabited by Germans. It is intimated that in no case will the Little Entente

Pertinax attempts actually to deem the existing frontiers on the ground that in the inextricable confusion of the Danubian races it is impossible to make homogeneous countries. Neither the Radicals who are adversaries of Italian and Hungarian Fascism nor the French Nationalists who approved Mussolini's Bethlen firmness but stand solid on treaties, offer the smallest encouragement, but on the contrary express the strongest opposition to the suggestions conveyed in the Rothermere interview.

Years but coming to the office every day would not be pleasant. Not that coming to the office is anything object in this subject. I want some kind of a background.

"Economics has always interested me, and I may specialize in this subject. The reasons for business who approved Mussolini's Bethlen must have some sound causes, and I am going to study them. Business, I think, should be more scientific. While I certainly don't believe in trusts, it does seem that there is a then try to live."

Effort to "Forget" Issue in Platforms Denounced in Radio Speech

WASHINGTON-Having submitted questionnaire to the several candidates for the Republican nomina-

didates for the Republican nomination for President, William E. Borah (R.), Senator from Idaho, has gone a step farther in keeping the prohibition issue before the party by delivering an address over the radio to the Women's Law Enforcement League convened in Columbus, O. Emphasizing of the issue at this time is regarded as complicating the Ohio primary situation. Both Frank B. Willis (R.), Senator from Ohio, and Herbert Hoover, Secretary of Commerce, have expressed themselves in favor of maintaining the prohibition statutes and enforcing them, the former in language considered more emphatic.

sidered more emphatic.
While Mr. Borah stipulated at the outset of his speech that nothing which he said was to be taken as having a bearing upon the Ohio campaign, which is for the people of the State to settle, it is taken by the politicians here as having a great deal to do with the Ohio primary. Agreement to Ignore Issue

Mr. Borah charged that there is an agreement between the leaders of the major political parties to ignore the prohibition issue in the coming campaign, and that ir consequence con stitutional government in the United States is in peril.

He minimized the use of fine advocated a plank in the Republican platform pledging allegiance specifito stifle the prohibition issue.

The Senator boldly defined other

issues. Referring to the recent oil lease disclosures he said:
"There are other matters in which your interests are involved and upon which good government depends. It will not be proposed either privately or openly in either of the conventions this time to trade oil for contribu-

"Bartering Government" "But it will be proposed and most earnestly urged that we trade principles for votes, which is infinitely worse. The most subtle, the most vicious, the most demoralizing form of corruption in which a political party can possibly engage is that of bartering government for votes.

"At a time when the Constitution is openly assailed and persistently defied, nothing could be more discouraging or more demoralizing than for the dominant political parties to remain silent and thereby connive

each other. But on this subject of maintaining and enforcing the Constitution there will be great effort to

obtain complete harmony.
"There will be an effort to adopt planks so meaningless and so near alike that the voters will have no choice—to have platforms which will disfranchise every man and woman who desires to record their

## Waters of Vast Territory Find Their Way Into the Mississippi FLOOD CONTROL BILL PUTS COST ON GOVERNMENT

Senate Passes Measure by Record Vote of 70 to 0-House Accord Expected

PLAN HAS APPROVAL OF SOUTHERN STATES

Program Differs From Views of President Coolidge-Civilian Supervision Called For

SPECIAL PROM MONITOR BURBAU WASHINGTON-Mississippi River flood control legislation is now entirely up to the House of Representatives and the President. The Senate enacted a bill dealing with the problem by a vote of 70 to 0, in 90 minutes, establishing thereby a record for speed in dealing with major legislation and laying

down a precedent for the Senate. For the first time, as far as can be recollected, the Senate acted first, and then made its speeches. Following the rushing approval of the \$325,000,000 bill, the Senate spent the rest of the day discussing the issue and the various legislative devices

The dispatch in dealing with the proposal was effected through an arrangement between leaders of both parties to adjust all differences in committee. This resulted in a bill that had been reported out by the Senate Commerce Committee being withdrawn, compromises inserted and a unanimously approved meas-

ure reintroduced. Measure Explained Briefly

The result of this agreement was immediate. No sooner had Wesley L. Jones (R.), Senator from Washington, chairman of the committee, finished a brief explanation of the measure than Simeon D. Fess (R.), Senator from Ohio, rose and asked the southern leaders if the measure was acceptable to them.

"Yes," answered Pat Harrison (D.), Senator from Mississippi. I am ready to vote."
"Vote, vote," was the cry that

went up on all sides. The final vote was delayed only long enough to accept by acclama-tion two minor amendments. Al-though no one was recorded in the opposition, William H. King (D.), was paired against the measure, and that if he could cast his ballot he

> They differ as to appropriation and administration, although not basic-"The ally. The House bill would authorize a total of \$473,000,000. The Senate bill specifies \$325,000,000. Leaders in

> > commissions to supervise the work, but the Senate act sets up an administrative agency of five; the Secregineers, the president of the Mississippi River Commission, and two civilian engineers to be selected by the President and approved by the Senate, while the House bill would establish a committee of seven, all to be appointed by the President and

confirmed by the Senate.
Of the seven members, however, four must be civilian engineers. This provision was included in response to widespread criticism of army engineers and to insure civilian control

of the vast enterprise.

This factor is the only serious difference between the two houses. Republican leaders of the House are willing to accept the Senate plan, but the Democrats are reacting, although their colleagues in the Senate agreed

to the commission of five. What Will President Do? It is agreed on all sides in both phases of the issue. The question is, what the President will do. On

disagree with his views. The President insists upon local contributions, and as a compromise suggests an economic commission to make a study of the matter and re-port at a later date to Congress, thus

not delaying the construction work.

The bills of both houses direct that the Federal Government pay all costs, and no mention is made of the economic survey recommended by the President.

The President advises army engineer administration. The Senate drastically modified such control; while the House has so far demanded civilian supervision. Likewise, the President, using army engineer mates, recommended an initial authorization of \$290,000,000. The bills of the two houses far exceeded this

can and Democrat leaders of both

WASKINGTON (4)—Standing quarely on the policy that the Government should bear all cost for uarding citizens of the Mississippi

guarding citizens of the Mississippi River valley against floods, the House Flood Control Committee made a formal report on the \$473,-000,000 Reid Bill which was approved a month ago. The report came into the House along with the \$825,000,-000 Jones Bill, passed by the Senate. The majority report, approved by 11 members of the committee, presented a voluminous argument of mearly 400 pages in support of the major proposals for full federal payment, sponsored by Representative Reid (R.) of Illinois, and of the establishment of a new Mississippi River commission to carry out the work.

The views of those members of the committee who disapprove the Reid ill were presented simultaneously bill were presented simultaneously in a minority report signed by six Republicans, headed by Representative Kopp of Iowa. This report set forth the contention that the valley states should contribute some of the cost of control work.

One of the leading features of the criticism

One of the leading features of the majority report was the criticism leveled at Maj.-Gen. Edgar Jadwin, chief of the army engineers, who was charged with having usurped the duties of the Mississippi River Commission on preparing the administration's flood control plan.

The army engineer was upheld, however, by the minority report, which contended he had recommended the best possible project for immediate remedy of the problem.

#### HOMES MORE CHEERY TODAY, WOMAN SAYS

Taste Being Shown in Decorating

Though the modern woman lacks ome of the resources of space and light which were characteristic of her grandmother's day nevertheless she has evolved a habitation which compares favorably with any in the history of household decoration and arrangement, Miss Frances McDonald said in the closing lecture of the series conducted collaterally with the International Exposition of

"The old red dining room and the dark brown kitchen of our grand-mother's day," Miss McDonald said, "are, we are happy to find, no more. Yet the modern woman has become deft in taking small, sometimes dark rooms of city apartments and transforming them into distinctive and charming rooms. She takes advantage of all the opportunities at her command.

REICH BELIEVES

Dr. Stresemann Approves Poincare Speech - Faith in League of Nations

BY WIRBLESS TO THE CHRISTIAN SCIENCE MONITOR BERLIN - Although Dr. Gustav Stresemann bitterly complained of the slow progress made by the Preparatory Disarmament Committee at Geneva, in his speech at the banquet given by the foreign press here, he nevertheless expressed his firm conviction that the League of Nations after all would master this problem Thus once more his faith in the ultimate success of good which is his characteristic feature and which has

characteristic feature and which has stood him so well in many past crises, once more retained the upper hand in his thinking.

Dr. Stresemann also stated he agreed with certain parts of Raymond Poincaré's recent speech, though he disagreed with the French premier's allusion to the Ruhr invasion, on the ground that it does nobody any good to refer continually to the past.

Dr. Stresemann Approves

Dr. Stresemann Approves Especially M. Poincaré's words about the misery which the war had brought on all nations, friends, foes and neutrals, met Dr. Stresemann's

approval.

In fact, he read out the French Premier's words in French. This is the first time since the war that a erman Minister of Foreign Affairs has openly agreed with M. Poincaré, who hitherto has always been decried here as the bitterest enemy of Germany. This undoubtedly was a great step forward and is so re-garded by the liberal press—the keep the properties in such condition Berliner Zeitung am Mittag writes, that nitrate production could be 'Dr. Stresemann offered M. Poincaré speeded up in time of war.

words that he believed the situation could be clarified sufficiently at the next meeting of the League of Nations to enable it to arrive at a definite decision regarding disarmament indicate that the German Government intends to take further steps in this matter before long.

First Step Feasible

Conditions today are far enough developed, Dr. Stresemann declared, to enable the nations to take the first step to disarm. Even if the world seemed further away than ever from disarmament, the League of Nations

disarmament, the League of Nations would not fail because it could not risk failure, he said.

Another problem which is foremost in the thoughts of the German people, namely, the evacuation of the Rhinelands, might come about sooner than expected. Evacuation, he said, was linked up with the reparation question, and, since the latter was not yet definitely solved, the evacuation problem was passing through a phase of stagnation. But a discussion regarding the settlement of the sion regarding the settlement of the reparation problem has already set in and the final settlement is no

## EARLY BUILDING OF NICARAGUAN CANAL PROPOSED

Definite Plan Offered in Senate-Urged as Help in Stopping Warfare

SPRCIAL FROM MONITOR BURRAU WASHINGTON—Napoleon's dream MOVE TO USE of a canal through Nicaragua linking the Pacific and the Caribbean would be made a reality by a bill in-troduced in Congress by Kenneth Mc-Kellar (D.), Senator from Tennes-

Long advocated by the United States Navy and shipping interests as a defensive and commercial proj-ect of incalculable value, made possible by the Bryan Treaty with Nica-ragua, and for almost two decades protected by American marines, the enterprise would be undertaken im-mediately under the McKellar

Congress is deeply interested in last year and crowded conditions in spread attention on the project.

Alternative Projects Naval and shipping experts appearing before Congressional committees have declared that either the Panama Canal must be enlarged or one through Nicaragua built. They have urged that work on either project be started at once, saying that by the time it can be completed the demand for increased accommo dations will be overwhelming.

the Nicaragua plan in preference to enlarging the Panama waterway. They estimate that the former would cost less and afford greater security in time of war.

Mr. McKellar, one of the leading senatorial opponents of the Admin-istration's intervention policy in Nicaragua, declares the building of the canal would divert Nicaraguan attention from war and internal dis-sension, turn "bandits into laborers and restore American prestige." Payment for canal rights would enhance the now precarious Nica-raguan financial structure, he said.

The McKellar bill would appropriate \$10,000,000 for immediate use in getting plans and preparations under way to begin actual work on the canal. He would finance actual con-struction by a \$200,000,000 issue of 3 per cent 30-year government bonds. To Take Up Lease

The measure authorises the President to take up the perpetual lease dent to take up the perpetual lease for the waterway rights that the United States secured through the Bryan treaty, and to negotiate with Costa Rica, Salvador and Honduras over their interests.

This accomplished the President would then be empowered to direct the "Nicaraguan Canal Commission"

the "Nicaraguan Canal Commission" to build a canal "from a point on the shore of the Caribbean Sea, near Greytown, by way of Lake Nicaragua, to a point near Brito, on the Paciac

The commission would include five members, appointed by the President with Senate approval, three of them skilled engineers, one an active or a retired army officer and the fifth an active or retired naval officer.

could largely break up the lawlessness. We have elected the prohibition principle to the Constitution.
The present problem is to elect a
prohibition administration to the
White House."

## SENATORS FIND NEXT MOVE ON COURT IS THEIRS

Foreign Relations Group Says President Cannot Act on Reservations

SPECIAL PROM-MONITOR BURBAY WASHINGTON—The next move in the World Court matter is up to the United States Senate and not to the

The Senate Foreign Relations Committee, taking under consideration the resolution introduced by Frederick H. Gillett (R.), Senator from Massachusetts, calling upon the President to continue his to obtain acceptance of the American reservations for participation in the World Court, decided that the responsibility rested with the Senate and not the President.

William E. Borah (R.), Senator from Idaho, chairman of the com-mittee, and speaking for it, explained that as the situation now exists two modes of procedure are possible: either the foreign governments must accept the reservations as the Senate ratified them, or the Senate must ance with the suggestions of object ing governments.

Five governments, Albania, Cuba Greece, Liberia, and Luxemburg, have accepted the American reservations. Mr. Borah said. Ten nations have acknowledged receipt of them without taking any action, and 23 have raised specific and definite ob-

lections to Reservation V. It is Mr. Borah's contention, approved by the committee, that before the Senate can ask the President to continue his correspondence with the other powers that it is up to the Senate to recall the court protocol and act upon the changes proposed by the

objecting governments.
"No one can modify Article V except the Senate," Mr. Borah said.
"The Senate should either permit the President to conduct his business in accordance with his authority or it should assume responsibility to call back the protocol and make such modifications as it is will-

ing to make."
Mr. Borah, although very much opposed to American entrance to the World Court, expressed his willing-ness to have the Senate reconsider the protocol. He declared, however,

#### FINGER-PRINTING OF MOTORISTS PROPOSED

ALBANY, N. Y. (A)—The possibility of finger-printing all motor vehicle operators in New York State in connection with the annual registration and issuance of driving licenses is being thoroughly investigated by the Bureau of Motor Vehicles, it was disclosed in a statement from Charles A. Harnett, com-

missioner.
State motor vehicle officials have come to the conclusion, Mr. Harnett declared, that some drastic step is necessary to tighten the regulation laws, and finger-printing has been suggested as a possibilty. Opinions of numerous responsible motorists are being gathered by employees of the bureau and a study is being made of the amount of money which would be necessary to put the proposed system into effect.

### Textile Unions Succeed in Opposition to Measure Manufacturers Urged

Limitation of hours of work for women under the 48-hour law in Massachusetts is safe from any modification during the term of the prestigation during the term of the prestigation. It was all the prestigations are the prestigation of the prestigat Limitation of hours of work for

### Lobbying on Both Sides

In view of this action, a second measure, proposing to permit 78 hours of work per year by women beyond the limits of the 48-hour law, is conceded to have no chance of adoption and probably will be dropped.

doption and probably will be dropped.

The night work bill has been the subject of active lobbying and letter writing by interests on both sides. The day of the vote saw two groups of women and girl textile workers, more than a score in each group, lobbying on different sides of the proposal. From Taunton came 25 young women urging that they have young women urging that they have the opportunity to work after 6

From Fall River and New Bedford 28 women, many of whom had worked in the mills for years, urged that mothers ought not to be called from their homes and children in the evening to fill out the family

## Intended to Relieve Depression

Intended to Relieve Depression

Defeat of the bill was considered a victory for organized labor, since the textile unions opposed it uncompromisingly, and the Representatives from the larger textile cities voted almost without exception sgainst it. The measure was sponsored by the Associated Industries of Massachuetts as a means of relieving depression in the New England cotton and woolen goods industries.

John Halliwell, Representative

dustries.

John Hailiwell, Representative from New Bedford, for years a textile worker, denied that lengthening the hours of work or increasing the employment of women and children is the way to bring prosperity to the industry. He declared if two shifts are needed, the mills should employmen on the night shift and women on the day shift. Miss Mastha N. Hrooks, Representative from Bloucester, was one of the 10 other speakers against the bill.

Speakers for the measure urged

Speakers for the measure urged the points that all other industries in the State are permitted to employ women until 10 o'clock at night, and that the cotton industry needs the same opportunity in order to meet competition for orders for style goods that must be filled in short time.

### D. L. & W. PETITIONED TO ELECTRIFY LINES

NEW YORK—The Delaware, Lackawanna & Western Railroad has just been asked to electrify its local lines in New Jersey. A delegation representing 23 civic organizations of the northern part of the State has presented a petition to J. M. Davis, president. They pledged their aid in obtaining a 15 per cent increase in commutation.

Seventy-five miles of line would be included in the proposed electric zone, among them being the lines from Hoboken to Montclair, Dover and Bernardsville. The cost is estimated at \$13,000,000 if power was bought outside, or \$17,000,000 if the road erected its own plant.

Revolutionary Lighting Fixture Built/

Nothing comparable to the EDEN AUTO-MATIC LIGHTING FIXTURE built. Its installation speeds work, cuts cost and increases production.

Saves Its Cost in a

HERE is the fixture you have waited for. Rigid in construction, yet almost as flexible as the human arm. The only "self positioning" light built. Amazing in its adaptability. May be attached to any wall or ceiling surface by the simple driving of four screws. By means of a double swinging joint in attachment head (a most beautiful and perfect mechanism) and a double ball and socket at the reflector end, the light may be directed from any angle or direction desired. Its 11-foot telescopic extension makes possible directing the light to any point within a 22-foot hemisphere. No lubrication as movable parts are equipped with ball bearings. Only adjustment necessary a pull or a push. No tightening of clutches—push it where you want it—high or low, to right or left, it "stays put."

Many Uses Ideal for factory machine shop, knitting mills, laundries, offices over ste-nographer or bookkeeper's desk, filing cab-inet, architects' or engineers' draughting room, work room, etc. etc.

Distributors Wanted! Open territory for EXCLU-SIVE distributors worth from 5.000 to 310,000 yearly. Only a small in-vestment of \$210.00 per quired for necessary stock of sample Satures and shades. We are building as organization of right think-tones to the second of the think-time Science Monitor If YOUR OWN BUSINESS, write today for FREE pres-pector,—WE TELL YOU HOW.

Cuts Light Bills The installation of the EDEN AUTOMATIC LIGHTING FIXTURE, reduces light bills by eliminating many unnecessary fixtures. Here is the lighting fixture that will solve the most difficult lighting problem in office, factory or work room.

The Right Light at Correct Focus

Speeds Work, Cuts Costs, Increases Production Manufacturers for more than a decade have been searching for just such a mechanically perfect lighting fixture. Everyone who has seen the EDEN AUTOMATIC LIGHT-ING FIXTURE, claims it to be one of the finest pieces of engineering work of its kind built. Here is the lamp that will cut your lighting bills by serving many purposes.

Also A Trouble Lamp

SEE ILLUSTRATION. Cord and lamp can't lay on the floor to get wet or dirty—reel takes up all slack. Cord rolls up like a window shade but has no ratchets or pawls to get out of order. Can be drawn out and allowed to hang, and weight of shade, lamp and double socket joint hold it in position. Push it up a few inches and it stays put. Reel equipped with ball bearings and controlled by triple spring tension. Fixture fully guaranteed.

## WORKING FARMS BY APPRENTICES IN AUSTRALIA

'Adelaide Government Revives System of Bringing Boys From United Kingdom

ADELAIDE, S. Aust.—The revival of the system of importing farm ap-prentices from England by the Liberal Government has been followed by the arrival in Adelaide of four rge groups of agricultural apprendices, every boy having already found ployment. The system had been ned three years ago by the

abandoned three years ago by the then Labor Government on the ground that there was no real demand for this class of labor.

Throughout Australia the Labor Party has been consistently hostile to immigration. It is claimed that the ranks of the unemployed are likely to be increased thereby, and that provision ought first to be made for Australian lads. Wages paid to the apprentices, it is also complained, were not sufficient, and conditions governing their employment were not satisfactory. The Labor Party contended that the boys were leaving their occupations, and drifting to the cities, and that they were being brought away from their homes at too early an age.

Some of these arguments are

Some of these arguments are doubtless without foundation. Under the new scheme the wages have been increased, and better conditions have been introduced. Attention is being paid to the social welfare of the apprentices, who come 12,000 miles away from their homes at, probably, the most impressive age, and closer supervision is exercised. Local committees are appointed to see that the employers and the apprentices respectively carry out their part of the agreement.

agreement.

In accordance with the "Big Brother movement," leading citizens meet the apprentices on their arrival in Adelaide. Many employers travel to the city and are introduced to the boys. They have luncheon together, a Government representative presiding. Usually a prominent public man offers a cordial welcome to the apprentices. Thus the first impres-

of Education for organisation purposes.

Two important cultural societies have been formed in connection with this university, one legal and the other philological, through the activities of which collective works of Ukrainian intellectual leaders of the present time are published. In 1925 a special jubilee publication was issued by them in honor of President Masaryk. Another in preparation deals with the findings of the Ukrainian Scientific Congress in Prague in 1926.

ing. Usually a prominent public man offers a cordial welcome to the apprentices. Thus the first impressions of the newcomers are happily formed.

The average lad from England has proved the right type—Industrious, honest and ambitious. The percentage of failures has been very slight. Some of the British apprentices have already excellent bank balances.

Every lad is nominated for a job before he leaves London, and there is always a waiting list of employers. The Government is careful not to keep the boys in the city a moment longer than is necessary. The usual procedure is to entrain them for their destinations the morning after arrival from England. Only one night is spent in the capital; in some instances, merely a few hours. The whole system is now organised in a manner that bespeaks permanency, and it is expected that sgme thousands of lads will be brought from England to engage in farm work.

## Impregnable Castle of the Taiko May Soon Be Restored by Osakans

Japan, for a passenger liner, the Chichibu Maru, the keel of which has been laid in Yokohama dockyards. The vessel has a length of 560 feet, a width of 74 feet, and a depth of 18 feet. The displacement will be 22,000 tons, and the speed 18 knots.

The Diesel motors now under construction in Copenhagen consist of two four-stroke double-driving motors, with twin screws. The vessel will be equipped with every luxury and is to ply between Japan and the west coast of America, especially Seattle and San Francisco. One of the chief characteristics about it is the single low funnel, the style of which is much in use at present, as it gives more room on the decks for passengers, than those with three or four funnels. Fortress of the "Napoleon of Japan" With Its Winged Pagoda-Like Roofs May Revive Its Medieval Grandeur in Honor of Enthronement

TOKYO—The remarkable "Castle of the Taiko" at Osaka is to be restored in part by the Osaka Municipal Government if the consent of the War Office can be obtained, in commemoration of the enthronement of the Emperor next November.

The Taiko, often dubbed the Napoleon of Japan. erected the most impregnable castle-fortress known to medieval Japan on a high hill overlooking the city of Osaka. The Tokugawa Shoguns, successors to his power as de facto rulers of the Empire, destroyed the castle buildings TOKYO—The remarkable "Castle was the erection of castles of great was the erection of castles of great artistic beauty.

A number of these castles still survive, the most noted being those at Nagoya and Himeji. The main palace in Tokyo was formerly the castlehome of the Tokugawa Shoguns, but it was never completed.

The Christian Science Monitor

Specialize in Remodeling. Old Furs Made to Look Like New

Outstanding achievements in better housing and some novel trends in architecture in Europe and the United States are being reported for THE CHRISTIAN SCIENCE MONITOR in a series of daily articles, of schich the following is the fourth.

IAL TO THE CHRISTIAN SCIENCE MONITO THE HAGUE-The Bourse designed by Dr. J. P. Berlage in Amsterdam and completed about 1900. marks a new era in modern Dutch architecture. Dr. Berlage expounded and illustrated the thesis that every period in history must have its own style, and that the exterior of a building should reflect its inward

purpose.

According to this view, which he demonstrated, to some extent, in the Bourse, but even more in his most recent work, First Church of Christ, Scientist, at The Hague, ornamentation takes a secondary place. It is not something necessary to the outside, but is only permissible as the logical outcome of the structure itself.

At first these views were ridiculed and pronounced revolutionary. However, it is largely because of them that the architecture of Holland is now in a state of development, unsurpassed in any country.

Amsterdam a Center

It was not without significance that in 1927 the great International Congress of Architecture was held at Amsterdam. In fact, the Dutch capital is one of the most remarkable centers in the world for novel forms of building, striking application of new materials and daring color

Holland.

In conversation with a representative of The Christian Science Monitor, Piet Kramer pointed out that the Amsterdam school is grounded upon the Berlage doctrine of unity of purpose and form, but is increasingly deviating from it. While accuracy and reasoning characterise Dr. Berlage and his following, the Amsterdam builders stress intuition. This trend has brought a certain joyous mess and fancifulness into their work, and more ornamentation.

While Amsterdam, the capital of Holland, is the center of one group of young architects. Rotterdam, Holland's greatest commercial city is the

of young architects, Rotterdam, Rolliand's greatest commercial city is the home of another school. Here J. J. P. Oud, director of public works, is the chief exponent of dectrines which are more nearly in accord with the Berlage conception. The purpose of each structure must be directly understandable from the outside and the building need not express a subjective sense of beauty. There are, of course, many other the building need not express a subjective sense of beauty. There are, of course, many other excellent and original architects in this country, but it is not possible to the possible of extended of permitting members and the Department of the what the speaker would wish to have said rather than what he did say. loans to municipalities and building societies.

Money is also provided by the Government for the demolition of slums, temporary dwellings and other undesirable residences. Persons living under undesirable conditions can obtain a subsidy of 600 florins toward a new house, provided they remain in it for at least 15 years, and the old dwelling is demolished.

The last abnormal renting conditions were eliminated in July, 1927, when the so-called House Rents Act was repealed. This act limited rentals to 150 per cent of the 1917 average. The fact that rents have not risen to any appreciable extent since its repeal is another proof of the return of sound conditions.

Progress Since the War

Since the war much money has been spent by the state and municipalities, especially in the big cities, to remedy the shortage of workmen's dwellings, and results have been gratifying. Normal conditions—that is, building by private enterprise without state aid—have, as a rule, been restored. In big cities there are already a considerable number of vacant dwellings.

Nevertheless, the Government still finds it necessary to encourage the building of modest dwellings by loans to municipalities and building societies.

## BOXING LAW REPEAL SOUGHT

Churches Launch a Campaign Throughout State

SPRCIAL TO THE CHRISTIAN SCIENCE MONITOR LOS ANGELES—A state-wide move-ment against the prize ring in Cali-fornia has been launched recently, and a portion of the press has joined with religious groups in seeking re-peal of present boxing law.

An initiative petition has been drawn by attorneys for the California State Church Federation which has as its object the placing of a proposi-tion for repeal of the "boxing and wrestling contests law" on the Nov. Initiative petitions are being sent

by the federation to approximately 2000 pastors throughout the State with the expectation that they will secure at least 100,000 signatures, necessary to gain a place on the ballot for the repeal measure. Many men and women prominent in the affairs of California have pub-

nembers sensed a forthcoming

change with precedent. Mr. Long-worth gave a sympathetic reception.

John J. Casey (D.), Representative

## Manager Form of Government Rests on Municipal Utilities

Gas, Electric and Water Supply Systems Must Show Profit, Hamilton, O., Officials Say

municipal ownership and operation of the gas, electric and water supply systems here from apparent failure to a profitable enterprise is the problem to which this city's government has dedicated its efforts. And upon its success in finding a practical solution of the problem many observers believe will depend the permanence of the proportionally elected council-manager form of government for Hamilton's 50,000 people.

"The successful struggle of the

charter government against tremend-ous odds which it now faces will prove one of the outstanding triumphs of the new form of government in this city," said Mayor Ray-mond H. Burke, former Miami Uni-California Federation of versity professor and a leader in drafting the new charter.

Mayor Burke and Russell P. Price, professional men, are attempting to will win the support of public

Practical Results Wanted

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR \$114,000 in the funds to be received HAMILTON, O.—How to convert municipal ownership and operation of the rese electric and water supply of 15 per cent and to the rate limitation.

tions fixed by Ohio statute.

Hamilton's utilities can be operated at "handsome profits," Mr. Price firmly believes. A competing private service corporation has made an attractive offer for purchase or lease of these municipal properties and Mayor Burke added that as a result the outcome of the "last stand" of the city to make a success of the utilities is being closely watched.

**Building Power Plant** With this powerful corporation as a competitor, Hamilton finds itself with one electric plant and another worth \$750,000 now being completed.

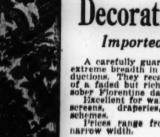

to serve the city and current to meet peak demand is purchased from the rival concern, the opening of the new \$10,000 a year city manager, and a plant will result in an oversupply.

This will necessitate the city entering the electric utilities field as an aggressive corporation to dispose of the surplus current and show a profit on the investment, according to Mr. Price.
The city has a gas distribution sys-

tem, buying a mixed gas and reselling it to consumers. The condition of majority with which the city this system, however, is said to demanager plan was carried after an aggressive campaign in its behalf. the mains were laid 30 years ago, the aggressive campaign in its behalf. It is realized that practical results will tell the biggest story when the voters go again to the polls, as opponents are keeping their case constantly before the public by suits threatening the legality of the present administration.

Hamilton, it should be pointed out, is one of the comparatively few age.

Another handicap in making ends the debt for gas is piling up, it is

Periods of financial stress are rought about by mass ignorance of rue conditions, it is shown, and if for no other reason than that if self-protection, the United States should take its place in this branch of social legislation with Great Britain, Germany, Belgium, France, Finain, Germany, German

While figures gathered for the report of the Bureau of Labor Statistics are probably the best available, even friends admit many gaps in estimates exist through lack of funds and machinery to collect information. These gaps are filled by "inspired guesswork."

The bureau based all figures on slackness of employment found in two trades—railroads and limited numbers of factories. Rail statistics are kept fully by Class I roads. The country has 187,000 factories averaging 44.7 employees. The Government tests employment in only 10,000 of these, or 1 in 20.

No record is attempted of employments, wallflowers, and spires addition for years to come.

WASHINGTON—The question of the number of unemployed in the United States is too important to be left in obscurity resulting from in-

the number of unemployed in the United States is too important to be made the sport of politics, or to be left in obscurity resulting from incomplete figures.

This is the universal opinion aroused by the controversy as to whether there are only 1,874,000 idle as stated by James J. Davis, Secretary of Labor, or 4,000,000, as charged by Robert F. Wagner (D.), Senator from New York.

Meanwhile the resulting publicity has shown methods of collecting data that in America lags far behind similar work in foreign countries. The Government employs only nine clerks to prepare its unemployment data in two rooms in a division of the Labor Department.

Analysis of the report submitted through Mr. Davis by Ethelbert Stewart, commissioner of labor statistics, shows the figures based on the minimum of evidence. Seven states, Oklahoma, Wisconsin, New York, Illinois, California, Maryland and Massachusetts, now make independent employment surveys and, according to Mr. Stewart, some spend four times the sum aplece that the United States Government spends.

Demand is made by business men and workers alike that increased appropriation be made to permit the Government to present monthly, or at least quarterly, reports on unemployment. There is no better way to nip incipient rumors of hard times, it is claimed, than to publish authoritative figures.

Periods of financial stress are received and of the ladeal Portland Company at Portland and Concrete, Colo. They they they they have the terms of the season. ter business conditions give new sest to this valley. A new airport for the coast mail and passenger planes, which will be electrically lighted at night, and which has a minimum of foggy weather, is being established near Ashland. A new stage terminal is being constructed here.

When the new Cossede Boute over

the Southern Pacific was completed the general attitude was that it would seriously affect the Rogue River Valley, but it only awakened residents to the need of developing further re-sources which are proving of greater value than the relatively small trans-portation loss.

### CONCRETE AIRPORTS ADVOCATED BY ACE

Capt. Rickenbacker Urges Fields for Giant Planes

SPRINGFIELD, Mass. (A)-Capt V. Rickenbacker, American War ace, in an address at the Nayaset Club, declared that the airport of the future will be a huge concrete platform a square mile or larger, instead of the grassed-over field of the present day. He urged that municipalities con-

templating the development of flying fields take into consideration this need for a permanent flat surface as well as the fact that the airplane of the future will be a monster com-pared with those of today.

"Even the largest planes we have today are nothing but small kites in comparison with what we shall have in a few years," he declared, "and the concrete airport will be as much a commonplace in five years as ma-cadam roads are today.

"Anyone who gives serious consideration to the progress which the airplane has made in the last few years will agree that the ships of the future will be of the 50- and 100-passenger type and flying fields to accommodate these will have to be much larger than those of today."

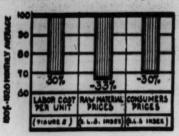

CROSSING TENDING LET OUT Work of tending 25 railroad cross ngs has been let out by contract to ings has been let out by contract to a separate company by the Boston & Maine Railroad, it has been announced. The New England Contracting Company has undertaken the work and will employ many of the present tenders. Railroad officials say the plan is not intended to affect the railroad's responsibility for safety at crossings.

PITTSFIELD AIRPORT LAUDED PITTSFIELD AIRPORT LAUDED
PITTSFIELD, Mass. (A) — Pittsfield's airport site is an almost perfect one, according to Dexter C.

and prices. Inefficient overproduction led to curtailed employment and a forced liquidation had out prices. But today production and costs have been brought nearer into alignment with consumption and selling prices. Balanced production and income always means more stable business. "The extent to which the primary factors of production costs have been reduced since 1920 to bring them into line with decreased selling prices is illustrated in the following chart: prices. Inefficient overproduc-

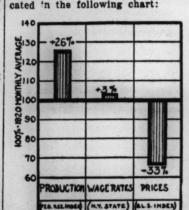

"One of the ways in which this present reduction under 1920 has been accomplished is revealed by a

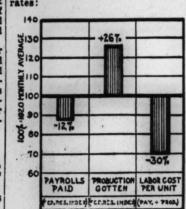

Wages Still Kept Up

"While the number of employees has been reduced, yet the individual worker has successfully resisted wage reductions. The real wage benefits that have resulted are indi-cated in the following chart:

manner by which costs have been re-duced may be found in this chart, which reflects the efficiency of management in getting greater output with a lesser total pay roll expendi-

Much Due to Management "It may be well to emphasize the point that all of the gain in output and reduction in costs is not due to machinery or the workers alone. Much is due to management which makes saving possible. It is largely by careful utilization of machinery and facilities, by planning, and by elimination of waste fime, management has been enabled to increase the output per worker to such a degree. For instance, management made it possible to increase the freight car performance per day 10 per cent sinc 1923. This means that the supply of cars was increased one-tenth without adding a new car. That is but one example of wealth created by man-

agement. While employment is important, and a condition easily discernible for charting purposes, it is one of the last to move and even then there is no accurate index to go by. Facgeneral barometer, but increased productive efficiency in factories has reduced the number of workers there. "But the workers released from factories are not all idle since the war. No less a statistician than E. S. Gregg of the Western Electric Com-pany has estimated that even since

# the middle of 1923, increased building activity has absorbed nearly a million workers; the automobile and its servicing have taken 500,000; hotel, restaurant, office building operations and the like have absorbed 150,000; moving picture production, sports and the like, 50,000; while many other expanding lines have absorbed several hundred thousands more.

more.

"All told, allowing for the full period since the war, it is probably true that no less than \$,500,000 workers have been absorbed into new industries or services and new developments of old industries. There are temporary irregularifies, as new uses must be found for absorbing the constantly renewed supply of labor thrown upon the market by factory afficiency, but enterprise quickly finds a new way to use the workers' valuable time.

Problem of Distribution "The enormous increase in the number of persons engaged in trade, transportation and clerical services means greater distribution, and the rising costs of distribution make up one of the outstanding problems of the day.

"We are in an era of such unusual efficiency of production that the enterpriser faces the task of market-ing the output of mass production without too great a sacrifice in price, or without too extensive concessions, in the form of free services. We have investigated to find out whether the real present-day problem pertains to the width of the profit margin itself, or whether marketing and selling collect to duplicate the strides toward. ailed to duplicate the strides toward greater efficiency made in the field

greater efficiency made in the field of production.

"Mass production has found the way to produce a greater output at a lower cost per unit. But we have not yet found out how to sell the greater output at a lower unit cost of selling. For this reason I feel that the subject of marketing and sales presents the most important of all the problems in budgeting today.

"The business creed which has already brought the United States its commercial pre-eminence is founded

on high output and high wages, reof these theories may have been tion, but under the pressure of circumstances they may now be applied to distribution.

### WARNING SOUNDED AGAINST BUREAUS

Justice Maltbie Says Rule Can Be Too Great

Warning of too great control by bureaus and departments was sounded by William M. Maltbie, Chief Justice of the Supreme Court of Connecticut, speaking at Boston University on the "liberty" clause of the preamble of the Constitution. "The functions of government to a great degree, within the past few

years, have passed from the legis-lative to the administrative," Chief Justice Maltble said. "Bureaus and one of the "fundamental causes for departments are often promulgating the ills of the industry." rules and orders that have the force Mr. Belden insisted that Mr. of law. Authorised delegates participating in the conference included men from Minnesota, Wisconsin, North Dakota, Illinois and Idaho, while a number of others took part in the conference merely as interested persons. Allege Union Mine Owners Are Using Profits to Buy Non-Union Properties

WASHINGTON—Leaders of union miners charged before the Senate Interstate Commerce Committee, investigating the coal industry, that coal operators were using diverging labor policies in widely separated properties operated by them to force down the wage scale and destroy the workers' organization.

The accusation was denied by William T. Belden, counsel for the Ohio operators. He informed the committee that he was prepared to offer evidence controverting the charge that Ohio mine owners employing union miners owned and operated West Virginia mines run on a non-union lowwage scale basis.

John L. Lewis, president of the United Mine Workers of America, reiterated the allegation and listed a group of large coal corporations in Ohio, which he asserted had mines in West Virginia which were operated as non-union properties, in Mr. Lewis contended that these West Virginia mines were purchased by the Ohio companies from the profits they made from their Ohio mines.

Mr. Lewis Explains Situation

Mr. Lewis Explains Situation Just how the operators play off a labor policy they enforce in mines owned by them in one state against a policy in effect in mines owned by them in another state was detailed by Mr. Lewis in an account he gave the committee of an instance with the committee of an instance with which he was personally acquainted. He declared that in 1924 the western Kentucky operators broke with the union and reduced wages on the isting legislation protecting such orground that they could not compete ganizations as the Roman Catholic with the Illinois mines. In 1926, Mr.
Lewis said, the Illinois operators
notified him that they wished to reduce wages because they could not
gent rules of Fascism." compete with the western Kentucky

On the Illinois operators' committee that met with the miners, Mr. Lewis related, was the president of a large coal corporation of western Kentucky, who several years pre-vious had made the same plea concerning his western Kentucky mines that he was now making on behalf of his Illinois properties.

Denial Made by Mr. Belden "When I pointed this out to the pathetic plea for reduced wages, he had nothing more to say," Mr. Lewis observed. "His fellow operators laughed at him."

This practice on the part of the operators, Mr. Lewis declared, was

in a particular case.

"Liberty so circumscribed was far from the thoughts of the fathers, and the thoughts of the fathers, and the committee, cautioned the committee, cautioned the committee. ought not we, as citizens of the Na- Mr. Belden on the language he was tion they established, to have in mind using, remarking that the operators months in the State without regis-

the propriety of restraints not hav-ing their origin in rules common to that he knew of a number of large operated mines in West Virginia. ### MINING OPERATORS TO MAKE OWN TERMS

Illinois Association and Men Fail to Reach Pact

CHICAGO (A)-The matter of bituminous coal mining in Illinois after midnight March 31 rests with individual mine operators. The Illinois Operators' Association, after refusing the United Mine Workers' wage demands Wednesday, released individual members to make what-

ever terms they desired.

Mines in southern Illinois which have been operating under a truce agreement between the operators' association and the union, have given no indications of any intention to shut down March 31. W. J. Jenkins of St. Louis, Mo., who was elected president of the operators, believes however, that few mines will con-

tinue working. A recent survey showed 57,285 miners at work in Illinois last month, compared with 90,000 a year ago. There were in operation 177 of the State's 225 mines.

## The Journey of Jesus

Ellen Conger Goodyear

THIS BOOK is a masterful and unique Apostolic narrative of the Jesus of History, compiled in chronological order from the four

One finds throughout the pages of the book a marvelously beautiful conception and coherent picture of the life of Jesus, arranged with such order and continuity that it gives the reader an intelligent, concrete and spiritual understanding of the Jesus, that everybody should know—the real Jesus of scriptural revelation who is the central Figure of Historic time.

The book is arranged in twelve chap-ters, tastefully bound in cloth, priated on heavy deckie edge paper with double margins on each page giving helpful ref-erences to the passages quoted. Alse a Summary of the Chapters most illumi-nating in their arrangement.

It is a book that might well be read by every student, scholar or layman, there is no better guide to show the way to the real historic Master, prophet and founder of Christianity than "The Journey of Jesus."

> Suite by Dr. Noelte on Mr. Stock's Program

SPECIAL FROM MONITOR BUREAU CHICAGO-Admirably varied music distinguished the programs of the Chicago Symphony Orchestra March 23 and 24. Mr. Stock began them Nothing could more appropriately make an audience to bestir itself in behalf of the neglected native composer than what Mr. Toscanini did at the Philharmonic concert of the evening of March 22, Carnegie Hall, in presenting the Symphony No. 2 in F, Op. 81, of Martucci. Now one type of national duliness is certainly no better than another; and a dreary four-movement lucubration by an American composer can be no more welcome on a program than one by suite can be taken as a criterion, Dr. Noelte has something to say worth hearing and knows how to say it to the best advantage. Evidently

over small range of mood. Must a nation, taking up a new form of art, go so long to school? Martucci 20 years ago just managing to master form, and Respighi today, barely attaining a free style and an unimtaining a free st voted to works for two pianos and whom the traditions of the grand orchestra, with Guy Maier and Lee Pattison as interpreters of the key-posed to stand illustrated, suffice it board parts. The E flat Concerto by whom the traditions of the grand manner of the keyboard may be supposed to stand illustrated, suffice it to remark that his recital at Carnegie Hall on the evening of March 23 was attended by just about all the removed planists at the moment in the city. It was attended by a vast numcity. It was attended by a vast numcity. It was attended by a vast numcity of the swell whom door the first Cincinnati Symphony Orchestra, presented on March 23 and 24 under the baton of Fritz Reiner, was divided between the appearance of Jacques Thibaud, violinist, as soloist, and the first Cincinnati performance of a composition by a Cincinnati musician, C. Hugo ber of young folk as well whom door-men and ushers speak of as students. chronism and unity of feeling had

The Christian Acritical Transfer Conductor of the Coluctor of the Coluctor of the Christian Coluctor of Mr. Thibaud, who presented the Violin Concerto of Beethoven, was obviously ill at ease. As a result his playing alternated between heights of rare interpretive beauty "Dies Irae," the "Tuba Mirum" and played the "Tannhäuser" overture, two of the Debussy "Nocturnes" and the Dances from "Prince Igor."

At the concerts of the Philadelphia Orchestra, Mr. Monteux went to Beethoven for his novelties and produced four short works never before performed at the regular symphony series of the orchestra. These were the Overture to "King Stephen," the Dance of the Dervishes and the Turk-

and poignant beauty than the two great subjects of that slow movenent, and it must be said that Mr. unquestionably the finest of the works for orchestra of this composer and one which Mr. Stokowski had not performed for a number of seasons by Mr. Monteux, especially the community of theme which exists almost throughout the work. The slow movement was especially well played. Lea Luboshutz played the Bruch G minor Violin Concerto. Mme. Lubo-

shutz revealed a beautiful tone quality and a technique ample for the demands of the concerto.

All-Russian Program by Cleveland Orchestra

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR CLEVELAND - The seventeenth pair of concerts by the Cleveland Orchestra had an all-Russian pro-gram. Nikolai Sokoloff conducts Russian music con amore, with and each bit of natural scenery is accorded a theme, and the plot of the tale is worked out through them. Manifestly such a scheme will destroy any hope of unity in the work. accorded a theme, and the plot of the tale is worked out through them. Manifestly such a scheme will destroy any hope of unity in the work, and the abrupt transitions, and abandonment of musical subjects before they had been adequately developed, also destroyed coherence. That which was left was picturesque, quite colorful, and sympathetically written for the various orchestral instruments in their solo capacity, but not particularly interesting.

In the last subject but one, Mr. Grimm really finds his stride and produces a beautiful theme for violins, but it comes too late to save the work, and is dropped out of sight just as hopes of a climax have been raised.

Mr. Grimm is a young man and his work is unquestionably promising.

Lunch it A.M. to 1:00 P.M. Work is able to get good effect in tone color. When he has been inpired by a musical conception as a whole rather than as a sequence of dissociated parts, he may turn out after 20 years.

has painted and plastic decorations he has designed for local and eastern theaters and churches. His fine Byzantine ornament on the Temple for comparative study from original El Manuel has won architectural works, always a fairer presentation prizes for that San Francisco synathan at this concert and the group of three short pleces by Dvorak, Glazounoff and Goossens, and the Beethoven E flat major Quartet were notable for their exquisite tone than through reproductions.

The Galerie Beaux Arts, 116 Maiden Lane, is showing the Howard and is now abroad studying Egyptian, Persian and Palestine ornament Robert Boardman Howard, Charles and sculpture. His more intimate veal his true stride as a modernist.

A touch of fantasy pervades his works, as well as those of the other Charles H. Howard's works are harder for the layman to accept. They are satirical and fanciful and yet so reasonable in their structure. He is a writer turned painter. He is entirely self-taught and pursues his art in New York City.

John Langley Howard, the younger brother, studied in New York and Paris, then again in New York under Kenneth Hayes Miller. His studies from a mountain farm in California are strong statements of the dignity of the out-of-doors. Another brother, Henry Howard, is an architect with stanch in æsthetic understanding They are refreshing after the vagaries of the lesser imported modern ists and they speak well for the Cali-fornia school of tomorrow.

New Stringham Work Performed in Denver

DENVER-A new orchestral composition possessing qualities which ments for modern living, even of a should make it of more than passing very simple character, are multiple. osition possessing qualities which Interest to the musical world was given its première here March 16 and 18 by the Denver Civic Symphony Orchestra, Horace E. Tureman, conductor. Dr. Edwin J. Stringham, dean of the Denver College of Music, is the composer of the new tone poem, which is entitled "The Ancient Mariner" and was inspired by Cole ridge's poem. Dr. Stringham's "Visions" had its first performance

something over a year ago. In this later work Dr. Stringham has followed a more definite "pro-gram" than he did in "Visions," advanced tendencies. Aside from the element of "family," this exhibit is moods. Selecting as a starting point noteworthy as an exposition of native and trained talents. The Howard Dr. Stringham utilizes, to establish boys have a strong impetus toward the festal atmosphere, a bagpipe a newer art, untrammeled and yet theme, which is repeatedly interthat throughout the work serves as the Mariner motif and in this first episode conveys the repeated efforts of the Mariner to find listeners among the wedding guests.

From this point the musical nar rative goes back to the beginning of cidents the tale which inspired it ences, the composer has penned many phrases which are frankly cacophonous. Indeed, with the exception of some enchantingly lovely measures very fitting on all their developments which accompany the introduction of that they seem as though they just a scraph choir, and another period grew out of their surroundings. fine-sounding coda, the entire work is phrased in dissonant and unresolved harmonies, intended to express the porticoes of columns, pediments,

unrest of the Mariner.
Dr. Stringham has shown a facile mmand of orchestral vocabulary in the horizontal, with the accent upon telling his story, and a fertile and the breadth, the flatness of the buildsourceful imagination in clothing its characters and incidents with appropriate musical habiliments. He for shape. It is interesting to observe has written a "modern" work which how an ingenious architect can renevertheless sounds like music to duce the formal details to simpler use conservative ears. The audiences at in less ostentatious examples, as in both performances manifested some-thing much beyond polite interest in the work, continuing its applause Italianate Examples until the composer had risen from his seat in the parquet and bowed repeatedly.

Mr. Tureman and his men deserve high praise for so adequately pre-paring and playing this work, which

CHICAGO — By scoring his second victory Wednesday, H. H. Hammer of New York City tied P. N. Collins of this city for leadership in the 13.2 balkline championship tournament of the Amateur Billiard Association of America at the Hamilton Club here. Hammer also took the high run honors with an 86 when he defeated R. V. Fessenden of Madison, Wis., 300 to 85 in 17 innings. Collins had the previous high, one billiard lower. Hammer made his big string in the tweifth frame, and in the fitteenth ran 81. Fessenden's best was 15 in a row. In the other game yesterday, M. P. McClure of Pittaburgh deated J. E. C. Morton of Philadelphia, 100 to 140 in 26 innings. McClure ran 10 in the fourteenth and Morton's best was 22.

The ski-jumpers had their serenity disturbed by the Gargantuan dimensions of the Olympic leap, specially constructed at a cost of more than 200,000 francs. Here a compromise had to be effected. The Swiss wished to start from the top of the run, to obtain maximum velocity; but the Norwegians argued that a top-class Norwegian jumper, leaping his hardest, would be bound to land on the flat. At first the committee made the competitors jump from about 20 yards below the top of the slope, with the result that there were few falls but no long jumps.

jumps.

After much discussion, however, the committee compromised and the second jump took place from only a few yards short of the top. The leading results of the jumping, arrived at after an abstruse calculation of points for style and distance, were:

MARK SET BY DODGE ACCEPTED BY UNION

DETROIT (A) - The one-mil traightaway motorboat racing record made by H. E. Dodge of the Detroit Yacht Club on the Detroit River last year has been recognized by the Inter-national Motor Yachting Union of Brussels.

Dodge, at the wheel of his craft,

Syndicate, covered the course at an average rate of 47.5 nautical miles per average rate of 47.5 nautical miles per hour, over a six-lap course, three up and three down-stream. It is the first time the union has accepted an American-made record. Official recognition in the form of a certificate from the union has been received.

The same craft, in the 20-liter class, also won the 1927 150-mile sweepstakes here and later won the Dodge Memorial Trophy and the president's cup on the Potomac River.

**Boston Entrants Eliminated** in U. S. Court Tennis Championship

NEW YORK—Three New Yorkers HARVARD BEATS and one representative of Philadelphia will be the semifinalists in the United tates court tennis singles champi ip, this afternoon, at the New York guet and Tennis Club. The three on entrants were all eliminated in the second round, scheduled for esterday, one being unable to comyesterday, one being unable to compete, while the other two were defeated in the two matches played. Dr. Channing Frothingham found himself unable to come on, giving a second default to John W. Appel Jr., former United States squash tennis champion, who thus reached the semifinals without lifting a racquet, except in practice. Another default went to the credit of W. T. Adee of New York, when Elvin M. Edwards of Philadelphia was also forced to default.

The other two matches brought enough sensations to make up for the defaults. The match between George W. Wightman, runner-up last year, and Williams C. Weight and Philadelphia

Wightman lost many points is trying to retrieve these.

Hewitt Morgan had little trouble in disposing of the veteran A. L. Devens, the other Boston player, the score being 6—2, 6—3. Devens played good tennis of the old-fashioned sort, but had no strokes that would bother the New Yorker, who is regarded as a probable winner, having carried Jay Gould to five close sets in the final round of the last championship won by the many-time champion. Morgan has not been competing for the title since that date, and his performance is being closely watched.

Fahys and Young each scoring three times. The summary:

YALE

SQUADRON A

No. 1—A. O. Wallop. Joseph Fahys Jr. No. 3—F. C. Baldwin. Arthur M. Koerner

Score—Yale University 13½, Squadron A. 6½. Goals—Baldwin 6, Ferguson 3, Young 3, Koerner for Squadron A. Referee—Maj. J. W. Rafferty, U. S. A. Time—Four 7½-minute chukkers.

It was not until the end of the third chukker that the Harvard team was able to overcome the handicap

Wightman made a fine start against the Philadelphian, and after dropping the first game after a long deuce fight, took the next three, and was within a point of leading at 4—1. But a chase to the line for the needed point went to Wright, and the latter led at 5—4. But again Wightman raised his game to its height, and covering the court with great skill captured a love game to tie the score. Then he reached set point at 40—30, but on the next rally, a low drive by Wright to the backhand of the Bostonian went for a chase of worse than three yards, and on the change of sides. Wightman lost the attempt to balance the chase, and Wright took the next two points for the set with the aid of his finest service.

to the the score. Then he reached set point at 40-30, but on the next rally, a low drive by Wright to the backhand of the Bostonian went for a chase of worse than three yards, and on the change of sides, Wightman lost the attempt to balance the chase, and Wright took the next two points for the set with the aid of his finest service.

Wright was now driving his shots with his utmost skill, and Wightman was unable to make headway against the tambour game and skillful service shots that Wright was sending over. Game after game went to the credit of Wright, only one break coming in each, when a desperate attack on the hazards by Wightman turned the tide for the moment. But Wright was also good in finding the hazards, especially the grille, and this balanced the account. The fifth game of the second set went to Wightman, and after Wright was leading at 3-0 in the third, he rallied once more, and though he lost the next two, it was only after carrying the score to deuce, and forcing change of service several times in each, on chases, and this finally gave him a lead of 5-0.

Wightman stemmed the tide temporarily in the sixth game, holding his own on the many shifts on account of chases, and this finally gave him a lead of 5-0.

Wightman stemmed the tide temporarily in the sixth game, holding his own on the many shifts on account of chases, and this finally gave him a lead of 5-0.

Wightman stemmed the tide temporarily in the sixth game, holding his own on the many shifts on account of chases, and this finally gave him the game. But on the next, though he forced deuce once more, wright had still his hazard shots in reserve, and sqored the next two points

## DR. NAISMITH WOULD LIMIT HEIGHT OF COURT CENTERS

Founder of Basketball Thinks Fixing of 6ft. 2in. as Maximum for Tip-Off Men Greatly Preferable to Eliminating Play Altogether

LAWRENCE, Kan.—That the tip-off in basketball is one of the fundamentals upon which the game was founded and adds much of interest and thrill to the court play, was the stand taken by Dr. J. N. Naismith, professor of physical education at the University of Kansas and the founder of the game of basketball, when interviewed here relative to the recommendation made by Coach J. M. Barry of the University of Iowa that the tip-off be eliminated as a means of speeding up play. Dr. Naismith fully supports the opinion of Coach E. W. Wachter of Harvard University, who stated recently that the elimination of the tip-off would mean an ultimate revision of the entire code of court rules.

The plan which has been advocated of starting the plays out of bounds, under the defensive them of basket the defensive them of basket and the district of the starting period, where the defensive them of the starting period, under the defensive team's basket the content to date in the training period, under the defensive team's basket to the recommendation made by Coach J. M. Barry of the University of Love the defensive team's basket to the recommendation made by Coach J. M. Barry of the University of the University of the stand them of the University of Love the defensive team's basket to the recommendation made the defensive team's basket to the recommendation made the defensive team's basket to the recommendation made to the provide the specific with the game the way it now thrilled with the game the way it now th

Dr. Naismith explained that when he started the game it was first his plan to throw the ball in from the side of the court, similar to the way the ball is put in play in English Rugby. Any man would be eligible to receive the ball. But there was no element of chance in it. The player throwing the ball in could spot his man, and it was apparently easy then to score a basket.

Advocates Another Plan

**OMBRE** 

E. W. Nevers, former Stanford University star baseball and football player, and more recently a pitcher for the St. Louis Browns with whom he will start the 1928 season, will desert professional football on the advice of St. Louis officials who do not wish to have him play football while signed to a contract to play with the Browns. As a result of his giving up the professional gridinon game. Nevers has accepted an offer to assist in coaching football at his Alma Mater next fall.

The National League will open its season with as powerful an all-round combination of teams as it has ever known. There is little to choose between Pittsburgh, St. Louis, Chicago and New York, and with Brooklyn and Boston considered much stronger for the coming season and Cincinnati ready for a better start than it got in 1927, the league should produce an even tighter race than it did last year.

Three more collegians failed in their initial attempts to make the big jump from campus to major-league diamond when Frank O'D Hurst, first baseman of the Cardinals, was sent to Syracuse of the International League. William Elseman, Yankee catcher, went to Hartford and V. A. Hansen, Yankee infelder, went to Waterbury. Hurst attended Ohio State where he starred in basketball, baseball and football, and Hansen and Elseman are Syracuse University graduates. Hansen was also a football and basketball star as well as baseball captain of his team.

Schaaf '29, captain-elect of the 1929 University of Pennsylvania basketball quintet and star guard of the the season just closed made 133 points in the Eastern Intercollegiate Basketball League competition of 1928, the highest total attained by any league player since 1923 when Capt. J. H. Luther '23 of Cornell scored 140. chaaf's feat was even more remark-ble because he was 43 points ahead of is nearest rival R. E. Langdell '28 of

Schaaf has been a consistent scorer on the Pennsylvania quintet for two straight seasons. In 1927 he finished fifth in the league standing, his sophomore year. Next year he should stand out as one of the greatest if not The hitting of Hazen S. Cuyler, Chicago's outfleder secured from Pittsburgh last winter, is still the brightest spot in southern training, so far as still the brightest spot in southern training, so far as sophomore year. Next year he should the Cubs are concerned. Having hit over 500 in the first few games, he added four hits to his total Monday and four more Tuesday.

The Yankees, world champions, lost their seventh game in eight exhibition contests to date in the training period. Tuesday, Ruth and Gehrig are still trying for their first home runs in regular play. The entire Yankee team is out of stride so far as hitting is concerned.

The Kele University nine is slated to

of Pennsylvania.

The Kelo University nine is slated to leave Japan on Thursday for United States soil. A team of 17 players is coming and will arrive in San Francisco, according to latest reports, April 13, the day after the major league season swings into full play. The Japanese will play on the Pacific Coast and then move eastward to play eastern college teams. The last visit of the Keio team was in 1914.

Of Pennsylvania.

Next to Schaaf in scoring was Langdell, Dartmouth star, with 90 points, two points ahead of L. E. Nassau '30, Yale's latest and most promising discovery. Langdell holds the distinction of making 23 points in one game, the best for the season. The best that Nassau and Schaaf could do in one last visit of the Keio team was in 1914. Nassau and Schaaf could do in one game was 19 aplece. That Langdell did not score more heavily than he did was due to the fact that the Green his nineteenth, and Collins his twenty-first full season. And they are all members of the Philadelphia Athletics this year. If experience can win a pennant then Connie Mack should finish well ahead in the coming race.

E. W. Nevers, former Stanford Uni-

next Dartmouth scorer was C. B. Spaeth '29 in fifteenth place. Among the first 10, Pennsylvania placed only one scorer, Schaaf, while Yale, Princeton and Cornell each had two. Columbia's highest scorer was F. E. Rieger '28, who finished eleventh with 56 points. Cornell's high scorer was Cort. points. Cornell's high scorer was Capt Theodore Schlossbach '28, ending in Theodore Schlossbach '28, ending in ninth place with 62 points. A record

of the individual scorers follows

## The Singular Story of Elihu Burritt

By ESTHER MATSON

school.

Eilhu was more than 16 by this young self-taught blacksmith of the time (much older than any of the town of Worcester. other boys there), and he had never been used to anything but little

tion from work in order to do more studying.

This time he went to the city of New Haven, because there was a library there where he could find the books he needed. It would take too long to tell what books they were. I'm sure they would sound perfectly dry-as-dust to us, but he positively delighted in them. It certainly was an unusual kind of vaccation, especially as one of the things he did in it was to teach himself Greek without any help but a dictionary.

Well, he went on this way for a library there where he could find to make a speech on his own account. He made a good one and was asked for another and another. Finally he had his hands quite full giving lectures and was able to give up his anvil altogether.

Nobody was more astonished at his success than he was himself. He modestly said he thought people called "A Walk from London to John o' Groat's," and then another called "A Walk from London to Land's End and Back." Indeed, he was altitudent. He modestly said to tell about his experience and besides he had an idea. He noticed a number of things in this state of society which we call our world that he believed then a book, often one expressly for children. In that day hardly anybody

"The Learned Blacksmith"

could be bettered. And it struck him that by lecturing he could help better them. In fact, if folks wanted to satisfy their curiosity coming to hear him they were welcome to, but before they left the fail he would give them some other matters to

give them some other matters to think about!

One of these matters was the drink problem. Another was the high rate of postage, especially on letters from our country to all the countries of Europe. Another matter was slavery, for this of course, was before the Civil War. He believed that our Government might buy the slaves T IS a good deal more than a hundred years ago since, one cold becember day, there was born in a little village in New England a baby boy who was to spend his life in quite a singular way. The little village was New Britain, Connecticut, the date Dec. S. 1811, and the little boy was Elibu Burritt, later known as the "Learned Blacksmith."

Elihu had both a father and a grandfather in the War of the Revolution, though that of course was before his day—and he had four brothers and five sisters—something of a family, you see, to find food and clothing for. That is why his father, who owned but a very little farm, had to eke out a livelihood in winter time by making shoes.

The house where they all lived, in the little village of New Britain, was only a story and a half high and it turned its gable-end to the street instead of its face, but in summer all the windows and the very little form yard were brave with marigolds and johnny-jump-ups and other old-time posses, so after all this Yankee family of a bygone century had some pleasures in life as well as hardships.

The coldest of the brothers, Elijah, contrived to get a good education and he became a schoolmaster. But and he became a schoolmaster. But and read and study in the evenings.

clothing for. That is why his father, who owned but a very little farm, had to eke out a livelinood in winter time by making shoes.

The house where they all lived, in the little village of New Britain, was only a story and a half high and it turned its gable-end to the street instead of its face, but in summer all the windows and the very little front yard were brave with marigolds and johnny-jump-ups and other old-time posles, so after all this Yankee family of a bygone century had some pleasures in life as well as hardships.

The oldest of the brothers, Elijah, contrived to get a good education and he became a schoolmaster. But Elihu, instead of "getting his schooling," as they called it in those days, was obliged to apprentice himself to a blacksmith. All the same this Elihu made up his mind to "get an education," and this is how he did it. Whenever he could get a spare minute he would spend it studying, and by after he had saved up a little money he asked the blacksmith for a leave of absence and with that started in as a pupil in his brother's school.

Elihu was more than 16 by this

most at heart was the Peace Cause, and when the Civil War broke out it would not have been surprising if been used to anything but little snatches of study between whiles, so he must have found it pretty disagreeable. Besides this he had to get along without a dollar a day which he had been making at the blacksmith's. However, he stuck it out for the whole three months of his leave of absence. Then he went back to the anvil till he had made enough money to take another vacation from work in order to do more studying.

This time he went to the city of This blacksmith, said Everitt with he had grown bitter and given up

children. In that day hardly anybody thought to write children's books, so was quite clever of Burritt to do so. He was clever, too, about choos ing titles—such titles as "Chips from Many Blocks," as "Ten-Minute

what we consider the ordinary com-forts of life, and he did not see the at all of his life-long labors in be-

if perhaps some fine day you should step into the Public Library in New Britain, Conn., and read there some of the letters written by "the learned blacksmith, Elihu Burritt," and some of the letters written to him by fa-mous men from all corners of the world.

The Problem of Radiocasting One of the problems at present

before the United States Congress is one that affects all radio fans and probably that includes most of the arisen. Each station operates on a stations are operating on the same wavelength it is impossible for the receiving set to separate them. Again, a station with high power can "drown out" a smaller station. What is to be done about it?

About a year ago, Congress ap-pointed a Federal Radio Commission of five men. For one year this commisson was to do its best to straighten out the radio tangle. At the end of that time, control was to pass to the Department of Commerce, though the commission would still act as a sort of special court of decision in particular cases. This commission has had a busy year regulating the wavelengths and power of radiocast-ing stations, and the times at which they should operate.

A bill on this subject has lately been passed by the Senate, and then by the House of Representatives and in particular the question of

# The Mail Bag

eas Mail Bag last Friday? If you do not wish to miss Mail Bag letters, watch the Daily Features section of the paper.—Eo.

Leiston, Suffolk, England We are very grateful for the Monitor and enjoy reading it. Even the so-called "big" children do appreciate the Children's and Young Folks' Pages. I always look forward to the true stories of animals and birds.

All kinds of feathered friends nest

All kinds of feathered friends nest and feed in our garden—tits, thrushes, blackbirds, sparrows, starlings, finches and others. We have a bird bath and it is great fun watching the antics of its users. I have just fitted up boxes for the nesting season, and have used the idea of old fruit cans with a small hole in the

bottom for an entrance. These, painted green and fixed horizontally to the trees, look very inviting.

Please will you forward the included letters to Karl and Tom.

With German, If any fellow, anywhere, would care to write to me, I shall be very

I am 20, and until last November had the privilege of being a pupil at a Christian Science Sunday School.

We have to go 24 miles to church.

My work is in the surveying and real estate profession. Edwin D.

Foochow, China

Dear Editor: I like to read the Current Events and the stories of "Wee Tales of Great Lands." I am making a scrap ok of all the nice stories, articles and pictures.

I wonder if any girl would like to

send me some stamps from Europe, Africa, Australia and America. I want mostly airmail from America. Elizabeth B.

Chicago, Illinois

Dear Editor:

This is my first letter to the Mail Bag, and I would like to write to some girl in England. I am 18 years old and am an active Girl Scout Lieutenant. As this is International Month of the Girl Scouts I thought that I could probably get in touch with a Girl Guide which is a part of the same cranination.

of the same organisation.

This morning I was reading the story of "The Littlest Scout."

I have attended the Christian Science Sunday School for quite

ome time.

I would like also to hear from some girl in the United States who would be interested in writing to Evelyn S.

Dear Editor:

I, like many other girls, am very much interested in The Christian Science Monitor, especially in the Young Polks' Page. I love the Mail Bag and read it every Thursday.

I am 14 years old and have just moved from Fort Wayne, Ind., to Baltimore, Md. I love it here, though I get quite losely at times for my half friends.

Can we send more than one letter too much work on you?

Dear Editor: I am now 14 years of age and have found work near a Christian Science Reading Room, and I have received

In our newspaper, the Hamburger Anzeiger, I have read that American girls and boys wish to correspond respond with an American girl. My name is Elfriede, but by parents called me Elfie, I am 14 years of age and still go to school. Elfie S.

The introduction to the list of names published at the end of last Thursday's Mail Bag should read:
The following would also like to receive letters:
This same list will be republished tomorrow, Friday, when our extra Mail Bag appears.—Ed.

The following would like to receive

The following would like to receive letters:

Beverly, J. (girl, 12). Chicago, Ill. Dorothy H. (13). Seattle, Wash, Mary O. (12), Minneapolis, Minn. Clara T. (14). Tallulah, La. David McA., Rochester, N. Y.—from French boy in French. Eileen W. ## THE HOME FORUM

## Contemporary Reading and Papers

in the world, a patient and apparently forgotten member of a group is to be seen here at all a group is to be seen here at all hours of the day, and it is strangely heterogeneous. The timid school-girl clutching her satchel is overshadowed by a policeman majestic in gilt buttons and spike helmet; the scholarly recluse in ante-bellum frock coat awaits his turn behind the fine lady whose gown and manner are the last cry of fashion. All these people come here to get books, but beyond that statement no further generalization is possible. They crowd in like bees upon a flowering apple tree, but out of the nectar they find here they will make numberless different kinds of honey. There was a time, and that not long ago, when all the few who read at all read with much the same motive. Today the motives for reading are legion. The scene at this delivery desk is vastly more complex than that presented in the scriptorium of an old monastery; it shows the baffling heterogeneity characteristic of our time; if it does not reveal the secret of modernity, at any rate it states the problem with great force.

The attendant has already been

in such a place as this even the most naïve worshiper of bulk and number would suspect his quantitative standards and even the statistician would realize for once that the crucial question is not "how many?" but "how good?" The printing press has been indeed, a marvelous multiplier, but the value of its product, like that of every other modern invention, depends always and entirely upon the value of the multiplicand.

THE CHRISTIAN SCIENCE

M standing beside the delivery Books innumerable are now within leak of the largest lending library easy reach of everyone, and everyone

characteristic or our time; it it does not reveal the secret of modernity, at any rate it states the problem with great force.

The attendant has already been fifteen minutes in finding my books, but he may take as long again if he likes, for I find this delivery desk one of the most interesting foci or concentration points in all the great city. The lending and hiring of books transacted here on a grand scale day after day would be enormously significant, if only one could understand it. I like to linger and watch these people, striving to understand. The business carried on over this counter is considerably more important than the trade in butter and eggs which is conducted across the street or that in dress goods of the shop next door. For this is the market of knowledge, of thought, and of dreams. He's you can invite Plate home to visit you, or Shakespeare if you prefer, simply by writing the name of one or the other on a slip of paper. Here is one of the points of fusion through which the past becomes the future. Hardly anything that is done anywhere is more important than what is done here. Hardly any vantage point could be superior to this for the study, or at least the contemplation, of the world of our day.

But how far can I see into this spectacle? What do I know about the motives actuating these many readers? The mere fact that they are many does not impress me, for in such a place as this even the most naïve worshiper of bulk and number would suspect his quantitative standards and even the statistician ber would suspect his quantitative standards and even the statistician ber would suspect his quantitative standards and even the statistician to fusion the condition of their thoughts and dreams interesting thing to have observed about the world we call ours, that it sunforms are seldom a good fit. I have heard it said that the fore-would suspect his quantitative standards and even the statistician ber original. How can anyone hope to make an ordered picture out of units that presist in acting in thi in the original. How can anyone

in the original. How can anyone hope to make an ordered picture out of units that persist in acting in this unaccountable way?

The motives that bring people to this desk might be arranged very roughly, passing from low to high, somewhat in this way: they are brought here by fashion, by the desire for rest or change, by curiosity, by the need for practical information, by the desire for knowledge, in quest of wisdom, and, finally, in a search for experience. Each of these motives is rarer than Each of these motives is rarer than the preceding, and, on the scale of literary and intellectual value, more might be freely translated thus: "Ho, literary and intellectual value, more worthy. One does not object that the fine lady should find here the book that everyone is talking about, so that she may sustain her part in dinner-table conversation, yet it is certain that the contribution to the world's thought of those who tread chiefly as a matter of fashion is scarcely more appreciable than that of those who do not read at all. One is slad that the thousands who turn to books for rest and change should find what they seek, although this motive is by no means lofty. Other thousands who read simply to slake an idle and purposeless curiosity about things in general might, at any rate, be worse employed, but there is no reason why we should praise them. Neither need we think very highly of the reader to whom a book is merely a tool which he uses in the execution of a practical task. Only when we come to those wind inheral sense, distinct from mere highly of the reader to whom a book is merely a tool which he uses in the execution of a practical task. Only when we come to those who read for knowledge in a wide and liberal sense, distinct from mere utility, do we reach true readers. Here, at last, we find a class to which books are not simply ornamental, diverting or useful, but quite indispensable. People who read in order to know and understand this intricate and mysterious world—we have to rate them high.

Where a drink of water may at any moment be the prime necessity, the contributions of the charitable have supported these men for many centuries—most probably since before the days of Isaiah. But now that over the city, and a plentiful supply of water is laid on, we may soon look and listen in vain for the picturesque water carrier and his chanted invitation.

The Laggard 4 4 4

But higher still, no doubt, are those who read not only to understand the world but to use the knowledge so gained in a finer and nobler conduct than they could otherwise have gained. These readers for wisdom are few, but my heart goes out to them. They have seen that no one can raise himself by his own strength, and that we need perhaps more than anything else standards of excellence such as only the long past provides. And finally, fewest and highest of all, are those who read simply for experience, those to whom books are chiefly an extension and enrichment of living. They have no ulterior motives whatever, but read as naturally as they breathe. Two or three such as these would justify all the traffic in this market of books.

As down this winding lane I go My ears are quick, my feet are slow, For "Stop!" each cloudy sallow-tree.

"Turn, turn again!" the blackthorn cries to me.

"Turn, turn again!" the blackthorn cries, "For wisdom enters at the eyes, And he that hurries past these snows

He is not wise as folly goes!"

"Stay!" call the sallows, "do not miss

One golden grain the sunbeams kiss!

We fleet, we fade, and when next year

We come, you may not still be here!"

I look and look, and yet again. But higher still, no doubt, are those

Hymn

Whilst I beheld the neck o' the dove, I spied and read these words: "This pretty dye
Which takes your eye,
Is not at all the bird's. The dusky raven might
Have with these colours pleased your sight,
Had God but chose so to ordain above"; This label wore the dove.

Whilst I admired the nightingale, These notes she warbled o'er: "No melody Indeed have I, Admire me then no more:
God has it in his choice
To give the owl, or me, this voice;
"Tis he, 'tis he that makes me tell my tale"; This sang the nightingale.

A Cairo Water Carrier

dwelt upon earlier—that the popula-tion of the United States is no "newer" than any other descendants

of our common European ancestry, and that migration to another part of the globe has not altered their

position in our common genealogical tree,—industrial Europe, with its factories and its characteristic towns,

has grown up side by side with the similar growth in America. The rail-

tion and that of all centuries preced-

ing the nineteenth, Europe and America acquired simultaneously.

Many of these appliances were in-

vented in America,—Princeton de-clares that the telephone was in-

I smelt and praised the fragrant rose,
Blushing, thus answered she:
"The praise you gave,
The scent I have,
Do not belong to me;
This harmless odour, none
But only God indeed does own;
To be his keepers, my poor leaves he chose";
And thus replied the rose. . . .

I touched and liked the down o' the swan; But felt these words there writ: "Bristles, thorns, here I soon should bear, Did God ordain but it; If my down to thy touch Seem soft and smooth, God made it such; Give more, or take all this away, he can"; This was I taught by the swan.

I'll learn this lesson, and escape the rod: I, too, have all from God.

-PATRICK CARRY, in "Trivial Poems and Triolets" (1651).

## The Eccentric

ascended with a rapid step, and ap-

The traveler rubbed his hands together with delight, and drawing a letter from his pocket, handed it to me without any remark. I broke the seal and read as follows: "My dear Audubon, I send you an odd fish, which you may prove to be unde-scribed, and hope you will do so in your next letter. Believe me always your friend B." With all the simplicity of a woodsman I asked the bearer where the odd fish was, when M. de T. (for, kind reader, the in-dividual in my presence was none else than that renowned naturalist), smiled, rubbed his hands, and with the greatest good humour said, "I am that odd fish I presume, Mr. Audubon." I felt confounded and blushed, but contrived to stammer an apology. We soon reached the house, when I presented my learned guest to my family, and was ordering a servant to go to the boat for M. de T.'s luggage, when he told me he had none but what he brought on his back. He then loosened the pack of weeds which had first drawn my attention. The ladies were a little surprised, but I checked their critical glances for the moment. The naturalist pulled off his shoes, and while engaged in drawing his stockings, not up, but down, in order to cover the holes about the heels, told us in the gayest mood imaginable that he walked a great distance, and had only taken a passage on board the ark, to be put on this shore, and that he was sorry his apparel had suffered so much from his late jouroccasions before he sat down to din-

conversation made us all forget his presently round singular appearance; and, indeed, it Princeton already has its own history; and though it is young in comparison with certain venerable foundations in Europe, even the Euro-wistfulness and romance, "that's the loose coat of yellow nankeen, much the worse of the many rubs it had got in its time, and stained all over pean visitor to America must still sort of thing we never see in my about him like a sack. A waistcoat of her dark-hued crew gathers on feel that it is a place through which country." many generations have passed; a place haunted by many memories, climate, golden-brown lichens did and inspired by a long and noble tradition. It is older, in fact, than "Dry climate!" he snorted, almost and buttoned up to his chin, reached below over a pair of light pantaloons, the lower parts of which were but-toned down to the ankles. His beard was as long as I have known my own tradition. It is older, in fact, than the great majority of educational institutions in England; and, if Nassau Hall could be removed hodily to England, the English themselves would regard it as one of the most beautiful examples of eighteenth century architecture now extant. There is considerable misapprehension... not only of Europeans, but of Americans, with regard to the relative age of the civilization of the "New world." Every decade makes the adjective "new" a little less appropriation. to be during some of my peregrina-tions, and his lank black hair hung tions, and his lank black hair hung loosely over his shoulders. . . He crowded beach in the tones of Stenhad come to visit me, he said, extor before the Argive hosts. pressly for the purpose of seeing my drawings, having been told that my representations of birds were accompanied with those of shrubs and plants, and he was desirous of knowplants, and he was desirous of knowplants. And the Tahitian boys and laughing about ing whether I might chance to have in my collection any with which he was unacquainted. I observed some legree of impatience in his request to be allowed at once to see what I the Marquesas has but how to be allowed at once to see what I added. White-clad couples stroll behad. We returned to the house, when neath the banyan's arboring shade, ate; and the "New World" has been the history books than the "Novum Organum." Moreover, in addition to the fact which I have dwelt upon earlier—that the population of the population of the second of before him.

Price Movement of Stocks Irregular-Some Make Good Advances

NEW YORK, March 29 (P)—Conused price movements characterized
oday's stock market, but the advanage rested on the side of those workag for higher prices.

Stiffening money rates and the prosect of a large increase in Federal Reerve brokers' loans after the close of
the market led to extensive profitaking and bear selling in some of the
scent favorites, but new leaders were
rought forward in the electric, public
tility and copper groups. Trading
howed a further slowing up in volme.

Greene Cananea jumping 5 points and Anaconda 2.

Dunhill International, Davison Chemical and International Telephone also recorded good gains. Radio ralled from a low of 168 to 1734 and then slipped back to around 171. General Motors, after selling down to 1824, rallied to around 185. U. S. Steel was heavy on predictions of a drop in March unfilled orders.

Western Ralis pointed upward in the afternoon trading with Union Pacific, Chicago Northwestern and Great Northern preferred in brisk demand. Some heaviness had developed earlier in New York Central, Chesapeake & Ohio and Texas & Pacific.

The closing was strong, Raliroads were the chief beneficiaries of a late buying movement. Union Pacific went up 34 to 1984, the best price in nearly 40 years, General Motors came back around yesterday's close, and advances of 4 to 5 points were made by General Electric, International Telephone, Fidelity Phenix Insurance, Archer Danlels Midland and Butterick. Total sales approximated 3,000,000 shares.

Foreign exchanges opened steady, sterling cables ruling unchanged around 34.883-16.

The bond market today displayed increasing activity and a firm undertone.

St. Paul 5s of 2000 again were a

increasing activity and a firm undertone.

St. Paul 5s of 2000 again were a
feature, reaching a new high at 71%.

St. Paul 5s of 1975 also were in demand, but showed no change after
opening at a new peak of 98%. Local
tractions showed increased activity,
Brooklyn-Manhattan Transit 6s advancing to new high ground at 99%.

Erie convertible 4s. New Haven 6s
and Southern Pacific refunding 4s
were inclined to softness.

Andes Copper Mine 7s, gaining more
than a point, and recording a new
peak at 132%, reflected the strength
of copper company stocks on the "Ligboard." Similar improvement in the
price of oil company shares lifted
Mutual Fuel Gas 5s more than a point
to a new high at 104%, Park-Lexington
Lease 6%s and American Beet Sugar
6s advanced more than a point each

Lease 6½s and American Beet Sugar 6s advanced more than a point each.

Western Electric Company for the year ended Dec. \$1, 1927, showed net after depreciation, taxes, interest, etc., of \$1,58,417, equivalent to \$4,68 a share on \$,750,000 shares. This compares with \$14,574,038 in 1926 after depreciation, taxes, interest and an appropriation of \$3,546,571 to employees's benefit fund, or \$19.43 a share, on 750,000 shares then outstanding. A special dividend of \$48,750,000 was received last year from Electrical Research Products, Inc., and distributed as a special dividend of \$13 a share to Western Electric stockholders.

N. E. TELEPHONE & TELEGRAPH
At its regular monthly appropriation meeting the executive committee of the New England Telephone & Telegraph Company authorized the expenditure of \$1,511,309 for new construction and improvements in plant necessary to meet the demand for service. Including this authorization, the total commitment of the company for plant expenditures this year is \$12,457,506.

INTERNAT. GREAT NORTHERN
International Great Northern for February reports deficit of \$23,109 after taxes and charges, but before adjustment bond interest, compared with a surplus of \$2940 in February, 1927. For two months, deficit was \$109,708, contrasted with surplus of \$55,072 in the first two months of 1927.

NEW HAVEN'S SURPLUS
New Haven Rallroad reports for February a surplus after fixed charges of
\$161,885, compared with a deficit after
charges of \$244,843 for February, 1927.
For the first two months of 1928 surplus after charges was \$224,235, compared with a deficit after charges of
\$463,168 for the corresponding period last
year.

OTIS ELEVATOR'S YEAR
Otis Elevator Co. for the year ended
Dec. 31, 1927, reports net income after
expenses, interest and reserves for pensions, contingencies, depreciation and
federal taxes, of \$5.649,034, equivalent,
after preferred dividends, to \$12.17 %
ahare on 432,182 shares of common (par
\$50). This compares with \$5,052,165, or
\$13,59 a share on 343,003 shares in 1926.

LONDON WOOL SALES

LONDON, March 29 (A)—The wool auction sales were concluded today with offerings amounting to 11,819 bales. There was a good attendance, and buying was general at current rates. The final tone was steady. Compared with the first series, scoured merinos advanced 5 to 7½ per cent, and greasy merinos rule unchanged to 5 per cent breds gained 5 per cent. Cape of Good Hope greasies were unchanged, but snow white sold 5 per cent dearer. During the sales the Continent bought 60,000 bales, the home trade 45,000 and America 4000. Twenty thousand bales were held over.

WASHINGTON. March 29 (F)—Secretary Meilon holds that the large movement of gold out of the United States during the last line months has had no material effect on the domestic money market. It was said today at the Treasury that although the exports of gold reached \$90,000,000 in March, this country still holds about one-half of the world's monetary gold supply and the outward movement can continue for some time without affecting the local market. The gold has gone out mainly to South America, England and France.

PALM BEACH REAL ESTATE WEST PALM BEACH, Fla., March 29

The refinancing of \$7,000,000 local bond and mortgage issues is the program to be undertaken by the Palm Beach Guaranty Company for the purpose of stabilizing real estate values and establishing the rapidly improving local business conditions on a firm financial basis.

BANK OF WESTFALIA

FREE TRADERS COMPARE PRICES OF AUTOMOBILES

British Protection of Sugar Beet Industry Is Also Denounced

SPECIAL PROM MONITOR BUREAU LONDON-Free traders in England are chafing under what they denounce as the growing burdens of protection. Lord Beauchamp, Lord Warden of the Cinque Ports, speaking at the London Liberal Women's Club, not only made this clear, but declared that at the rate duties are being imposed upon certain imports under the Safeguarding of the Industries Act, Great Britain is heading for almost certain alienation of her commercial treaties with other European nations.

Lord Beauchamp, in his criticism of the Government's policy, compared motorcar prices in the United States, where wages are high, with those in England, where wages are low. The British motorcar industry enjoys protection, he said. Quoting F. W. Hirst's figures, comparing the prices of American cars in United States and in England, he United States and in England, he said the cost of a touring car in Detroit last year was £78, compared with the London price of £150 for the same car. Other prices were: Sedan and coupé, Detroit £100, London £185; sport coupé, Detroit £112, London £205; four-door saloon, Detroit £115, London £215. Despite protection, the speaker alleged, the position of the British motor industry was "not satisfactory." As for artificial silk manufacture, that was booming.

"The sugar beet factories have given employment, but for every man employed in the state of the said the sai

given employment, but for every man employed in a beet sugar factory employed in a beet sugar factory two men have been put out of employment in sugar refineries and we are paying £10,000,000 to do it. Our hope is that as the subsidies on coal and corn defeated their own object. so the size of the sugar beet sidy may cause an outcry that may put an end to it."

In conclusion, Lord Beauchamp referred to "the enormous service the League of Nations had rendered to the world" in holding the international economic conference at

## Associated Gas and Electric System

## Objects of Refinancing

Two years ago the management of the Associated System inaugurated an extensive program of refinancing which contemplated:

- Retirement of outstanding high coupon bonds and high dividend rate preferred stocks of subsidiary properties.
- Issuance in exchange therefor of Associated System securities which, as the obligations of a larger and financially stronger organization, bear lower interest rates.

To date, over \$70,000,000 par value of underlying securities have been retired. This has brought about substantial savings in interest charges, and a simplification of capital structure through consolidation of numerous debt issues into major obligations of the Asso-

Many mortgage issues are now being called for redemption. The amount remaining in the Associated System is less than 12% of the entire capitalization. Many properties

Refinancing already accomplished has brought certain definite results:

- The credit standing of the Associated System has been so improved that recent financing has been done with 4½% bonds as against 5½% bonds
- The elimination of underlying securities has brought the bonds, pre-ferred and common stocks of the Associated Gas & Electric Company close to the actual physical properties so that they receive more directly

The Associated Gas & Electric Company is now offering to stockholders the right to subscribe to a new issue of \$50,000,000 41/2% Debentures convertible into Class A and common stock. The proceeds of this financing will be used largely for further retirement of underlying and higher coupon issues, which, to the extent that such retirements are effected, will still further strengthen the credit of the Company and enhance the investment position and earning power of its preferred, Class A and common stocks.

Listen, all ye fans! Did you know that "exhaustive tests" by the coun-"foremost radio engineers" "demonstrated beyond any doubt" that supplying the detector and R. F. tubes from the same B supply source is "wasteful, insufficient, expensive and obsolete engi-neering practice"—did you? "Tis a sad tale, but if you will listen we will try and show you how wrong most of the B eliminator and set manufacturers really are.

There came to hand today a catalogue of a well-known radio mail order house featuring in its center spread a 210 push-pull power amplifier. We instantly recognized this as the product of one of our very best audio and power unit manufacturers, having seen these units going through production. They are excellently designed and made, but were primarily intended for the phono-graph trade and therefore consist of a stage of 227 audio feeding into a 210 push pull audio stage. Since for use with electrical for taking B voltages from the unit, had gone, but there is still evidently ickups there is no provision made

given to each one. The phrases that describe the apparatus are all right, but then we come to the fol-

Q. How do you make certain then that the Dodo will work with practically every set?

A. By entirely new principles of design and construction, in so far as home radio equipment is concerned; principles which heretofore have been used only in the most expensive and highest quality commercial apparatus.

Let us state at this point that this unit is not sold under the manufac- of a whole page full of these things. turer's name, for he would never permit this sort of thing, but is given a trick name for which we have substituted the famous name, "Dodo."

time of the ending of the north sig-nal is observed and a stop watch is reached a simple calculation gives the observer's bearing from heacon. As the rotation of the loop the selection "Chimes of Normandy" the selection "Chimes of Normandy" Degrees Permits Instantain the 60-minute program of the

Degrees Permits Instantathe number of seconds from the reception of the north signal to the
program for permanent enrichment zero multiplied by six gives the bearing in degrees, and calculation can Greece and Syria with a rapid introbe avoided altogether if the stopwatch dial is graduated in degrees.

Hitherto experiments have been made on a wavelength of 525 meters, but under the recent Washington Wireless Conference this will have to be moved up to round about 1000 meters. So far as is known this rotating beacon is not being experimented with in any other country At present France occupies a leading position in regard to wireless beacons, as in five years' time she ter and larger crops. The total re-hopes to have a network of 29 radio sult, he declared, is a marked intablished this year on her channel and Atlantic coasts.

High expectations have been formed of the rotating beacon transmitter which, if fully realized, may a range of 250 to 300 miles will send lead to their use entirely of light-houses. This system makes use of This and three other stations will a vertical closed loop rotating at a be powerful ones and kept working uniform speed of one revolution per minute. The radiation from the loop is a maximum in the plane of the But the usefulness of all wireless loop and zero at right angles to that stations naturally depends on the inplane. A special signal, which may stallation in ships of receiving apbe termed the north signal, is sent paratus. At present only about 9 per when the plane of the loop is per- cent of the world's shipping is so pendicular to the geographical meri- fitted.

#### ENGINEERS TO STUDY FLOODS IN VERMONT

visory commission of engineers has been organized here to make a sur vey in Vermont with a view to pre-venting floods. J. W. Votey, dean of the University of Vermont College of Engineering, was named chairman of the commission and Prof. H. K. Barrows of Boston, consulting engineer The commission plans to establish score of stations along various streams to determine the flow of water at various times and under difthus obtained, the locations of suitable reservoirs to control the water flow will be determined.

Rata Présent Rata Présent, who appeared as asartist with the People's Symphony Orchestra Sunday after oon, gave a recital of piano music at Jordan Hall last evening. There she bettered some previous impres-sions and intensified others. Perhaps Miss Présent's outstanding ability is her skill at coloring and contrasting tones. Through varying her dynamics and through pedal variations she makes her tones run a brilliant gamut of colorfulness. Again, she unfolds melodies with such care and devotion that they sing their way through phrases and whole compositions with unusual freedom. Her technic is fluent and able, although not invariably accurate. A few times, for example, she blurred paysages in the Beethoven Sonata, Op. 111. But the only obvious deficiency which emerges from Miss Présent's

playing is an inclination to ignore strong rhythms and to substitute for the inherent pulsation which is es-sential to fine playing a more per-functory accenting which confines itself to measures rather than to long, extended phrases.

The program last evening began with Bach's B flat minor Prelude and Fugue (Book I), which Miss Présent played with delicacy for the prelude and a clear brilliance for the fugue. Next followed Beethoven's last Sonata, which so many planists find fascinating to play, and which so many audiences listen to with reluctance. Last evening's performance of it, a capable one, did not rise to the rarely achieved heights. A group of Chopin, played with competence, but not exceedingly poetically, gave lit-tle indication of the fire and brilliance and eerie grace which Miss Présent wrought into Ravel's "Jeux d'Eau," Albeniz' "Cordoba," Stravinsky's F sharp major Etude and a "Danza festiva" by Medtner. It is, therefore, regrettable that the pianist altered the order of her announced program.

BUSINESS OPPORTUNITIES

This fact, of course, makes it impossible to get as high a price for ask that the readers use the utmost them as with the B supply and they are offered at a very low figure. This is a remarkably good buy for anyone afford to take a questioning attitude and we are glad the public has the opportunity to purchase such an affair at such a price. The catch is in the way it is exploited.

This profession is "dragged about by the way it is exploited." This concern falls back upon the copy for radio manufacturers. The worked-to-extreme idea of questions and answers to bring out the pression of serious, efficient work points they want to emphasize. Of being done on a design and the course the questions are manufac-tured so that a certain answer can Too many people have the wrong

uperior to many units. Electrically, follows standard practice with very high-quality parts being used.
And then comes the real point, the true bone of contention. Since the

With our world-wide news services, own constant contact with manufacturers and engineers, including I. R. E. conferences, mail the are advanced enough to see casting System. casting System, at 10:30 o'clock Eastern standard time, Friday night, March 30, is the "Flame Dance," written by James P. Dunn, an Amercan composer living in Jersey City,

This contention becomes positively breath-taking in the last words of this classic answer, for we find that a common B supply source for the whole set is "wasteful, insufficient, expensive and obsolete." Who would be the breath the property of the wooden shoe Dance who would be the breath the property of the property

one discussed above is as follows:

Q. Do you recommend then, a separate B supply for the radio and the use of the Dodo as a complete self-contained audio unit?

A. Yes. Such an arrangement, properly installed will decrease AC hum, stabilize current supply to the set, help to eliminate background noises, practically eliminate motor-boating, improve distance reception, and of course greatly improve tone and volume of both local and distant stations and aid in making the receiver less susceptible to line disturbances. So Massachusetts 'Tech' Bursar Tells Rotarians With almost every college today supporting a "bank" for the sole purpose of making student loans, the

trend is to bring the process more nearly onto a business basis, and the percentage of unrepaid student loans becoming smaller and smaller, Horace S. Ford, bursar of the Massa chusetts Institute of Technology, told the Rotary Club of Boston. Using "Tech" as an example, Mr. Ford showed that while approximately 5 per cent of the student notes now held were beyond hope of collection, the majority of these were made in the immediate post-war period, where sentiment was

Today, he said, a student loan is made much after the orthodox bank manner, save that the college is willing to assume a greater proportion of personal risk. About \$80,000 in free scholarships are in part available to first and

second year men whose needs are

## IN THE LAST ISSUE,

"The knowledge of words is the gate of scholarship."

The familiar pastime of skipping fat stones over the surface of water is rightly called ricochet. This is also the term for the bounding and rebounding motion of a projectile thrown close to the ground.

of a projectile thrown close to the ground.

The verb "to ricochet" consequently means to glance off or skip along. It is a French word taken in its entirety, pronunciation and all.

In early French literature we find the wren called ricochet for its recurring refrain. With this same idea in mind we have termed certain double words "ricochetwords." These, as a means of intensifying their force, duplicate in the second half the sound or sense of the first as "hob-nob," "chitter-chatter," "namby-pamby," "rosy-posy" and the like.

The preferred French pronunciation is ric-o-chet,' the last syllable

### The Stock Market as an Index

THE New York Stock Exchange is experiencing the most remarkable period of activity in its history. Time was, not long since, when a day in which 3,000,000 shares of stock changed hands was looked upon as an extraordinary phenomenon. The exception has recently become the rule. For ten successive trading days the 3,000,000 mark was passed, then the 4,000,000, and last Tuesday the 5,000,000 mark was approximated. Last Saturday saw the greatest volume of business transacted that has ever passed through the exchange on a short day: in the two hours of trading almost 1,000,000 shares an hour changed hands.

This extraordinary development has been a "bull" movement. Almost every day has seen new "highs" recorded in important issues. Three or four stocks have acted as leaders for about twenty-five others. General Motors and Radio have not been alone, but have swept upward with them numerous other automobile stocks, as well as steel, railroad, electric and other issues. Telephone, telegraph and talking machine stocks have also played their next tooks.

stocks have also played their part. What have been the reasons for this extraordinary development of trading activity? In a dinary development of trading activity? In a general way, one may attribute it to a long period of prosperity. For at least five years the United States has been favored with conditions which have vastly increased the funds available for investment. Just now money is exceptionally "easy." To be more explicit, these phenomena have resulted from the enormous and rapid development of new industries which, commencing with small capital, have attained enormous stature in a few years' time, and give mous stature in a few years' time, and give promise of long activity and continued growth.

In another respect, this astounding upward movement is the result of the striking tendency toward consolidation which now characterizes the principal industries of the country and makes capitalization possible on a scale hitherto undreamed of.

Other factors which may be cited as contribut-ing to the present state of affairs are certain developments which have made it possible for potential investors in all parts of the United States to keep in close touch with the New York exchange. The principal New York brokerage houses have opened numerous branch offices not only in various parts of Greater New York, but in many other cities of America.

"How long can this go on, and what are to many brokers, investors and economists are asking. Bold indeed is the man who presumes to answer such questions with assurance. Two principal trends of opinion can, however, be distinguished. The one maintains that the present activity is mere speculation, artificially induced, without sound foundation in national prosperity, which must end as other great stock flurries have ended, in catastrophe. Others-and these are probably in the majority-see in these recent developments an indication that industry and commerce in the United States have entered upon a new stage in which operations upon a much larger scale are to be the normal state of

## Latvia and the Russian Soviets

HE evolution of the Republic of Latvia, like that of her other Baltic neighbors, continues to be intimately bound up with the affairs of Russia. When the Latvian-Russian trade treaty was ratified October 27, last year, by the Lettish Parliament, the step was regarded with misgivings in many of Europe's informed circles, notably Great Britain, because that country's particularly trying experiences with the Russian Soviets had given to it ample cause to question Moscow's motives. But these apprehensions have not proved fully grounded.

The Socialist-Populist Government of Latvia that signed the treaty with the Russian Com-munists was composed mainly of Socialists, in-cluding the Premier; and its program, like that of other European governments veering toward Socialism, consisted of what is termed by them 'fighting against social and political reaction.'

For analytical purposes it may here be re-called that when the Socialist Government of Lithuania, Latvia's close neighbor, signed a trade treaty last year with the Russian Soviets, the move was almost instantaneously followed by a military coup d'état sponsored by re-actionary forces that lost no time in repudiat-ing the so-called agreement.

Not so with Latvia. While reactionary elements naturally began making themselves heard and felt, after the conclusion of the Latvian-Russian trade treaty their momentum seemed to be slower, and so far they have not proved strong enough to set up the dictatorship which is, according to Lettish labor leaders, their aim. These same labor leaders (they include the strong Socialist Party) claim that they and their followers are strong enough to defeat any such moves on the part of the so-called Lettish Fascists.

What did happen was that the reaction against the trade treaty finally caused a split in the Socialist Party which in turn was responsible for the resignation of the Government, the first part of January, this year, as well as the formation of an Independent Socialist Democratic Party. A Conservative government was

then set up by Peter Juraszewski of the Centrist Party who is the present Premier. While Mr. Juraszewski is said to be an extreme Nationalist, many members of his Cabinet call themselves nonpartisans. As is the case with most Nationalist coalitions in their early stages, the present Latvian Cabinet is probably not only anti-Russian but anti any foreign country.

### What Will They Do With It?

TATS off to the women of England! The For decades past they have been waging a war against seemingly overwhelming odds. They at times resorted to desperate and somewhat questionable tactics, but they have won, and what has become known the world over, derisively in the beginning and later with considerable respect, as the "flapper vote," is now practically an accomplished fact. For the bill enfranchising British women is drawn up on noncontroversial lines, and, having passed its first reading, should become law before the end of the present session, or at any rate in time for the women to vote at the next election.

The question now is, What will the women do with their dearly won prize? By its action the Conservative Government will be adding, in round numbers, no fewer than 5,000,000 names to the electoral lists, all women. Not only will the women of Great Britain thus gain the vote, but they will also obtain quite a respectable preponderance of the voting power of the country—in round numbers 2,250,000. There are 21,730,988 voters, men and women, at present. The men are entitled to vote at twenty-one years of age and the women at thirty. Under the new arrangement women twenty-one years old will also vote. A very large proportion of these 5,000,000 new voters are members of the middle classes, who normally would either vote Liberal or Labor. Of course, a lesser proportion of the new voters belong to the more conservative section of the community.

It is an open secret that Labor hopes for a considerable increase in its voting strength, but the Liberals are also expecting to attract support from both of the other parties, on the ground that the country is tired of the party in power and looks with apprehension upon the Labor Party and the policies advocated by extreme Laborites, with whom it should, however, be added that Mr. MacDonald has little sympathy.

The elections in the British Isles probably will

not take place until next spring, unless the unforeseen happens. The Baldwin Government has a majority around 200, but many of the seats at the election in 1924 were won by narrow majorities owing to triangular contests. In not a few instances the candidates were returned by minority majorities, the votes cast against them being split between the other two candi-dates. This is where Labor expects to win a number of seats which it lost at the last election in the triangular contests. On the other hand, it may be that in a flush of gratitude to the Government which at length has enabled them to exercise the franchise many of them will cast their first vote for the Conservatives.

## Who Shall Pay for the Roads?

A SSOCIATIONS representing American own-Hers and manufacturers of motor vehicles are joining with the farmers in a movement to oppose any further extension of the toll-road system throughout the United States. The policy of granting to private corporations the right to construct roads and bridges, for vas charged to the users erally favored a century ago, when the sparse population could not afford to provide these facilities at the public expense. With the gradual development of prosperous communities a demand arose for the abolition of the toll system, and until a comparatively recent period the prevailing sentiment seemed wholly opposed to its continuance. In many instances the roads and bridges constructed by private concerns were bought out by municipalities, counties or states and the tolls abolished.

The coming of the motor vehicle as a universal method of transporting passengers and freight produced an urgent demand for more and better roads, while the much heavier loads transported by the new agency made it necessary that stronger bridges should be provided. To meet this demand a resort has been made in some regions to the abandoned toll system: a number of costly bridges having been erected by private enterprise, while many others are projected. Plans for constructing private roads to be devoted wholly to motor vehicle traffic are also being promoted, the financial returns from toll bridge operation indicating that toll motor roads would be equally profitable.

The chief argument advanced for what would appear to be a backward step in furnishing facilities for transportation is the alleged inability of local, county and state authorities, even with the large amounts voted by the Federal Government, to provide the necessary funds. Whatever merit there may have been in this contention in the past, the great volume of idle capital now seeking investment is an assurance that bond issues for needed public improvements can be sold to almost any desired amount. If the payment of interest charges on such loans is regarded as involving too high tax rates, there would seem to be no good reason why, if transporation tolls are to be imposed, they should not be collected from roads and bridges built and owned by the public, until the cost of construction has been met.

## New Lines of Communication

TERGER of the so-called Mackay Com-M panies with the International Telephone & Telegraph Corporation brings into existence a unification of a large system of communications spreading over Europe and the Americas. It will establish, under one direction, a system which can match the vast services offered by the American Telephone & Telegraph Company, which, through telephone, telegraph, cable and wireless services, can reach almost all points of the world with messages. Coincident with the announcement of the new merger reports were received from Europe that the leading British communications companies are planning to unify.

It has been demonstrated in the past that a communication line increases in usefulness to

the extent it is aligned with other means of communication. A telephone subscriber finds his telephone of more use when the number of telephone users in the community is multiplied. The same is true in the field of general communication. In linking up the telephone systems with the telegraph lines, as was first done by the Western Union and the Bell System, it is not only possible to effect economies in operations but also to multiply services. By linking the telephone, the telegraph, and the cable systems the services to the public are still further increased without adding to the physical plants.

Recently a radiotelegraph convention was drafted by the leading nations of the world. The short wave channels were reserved for commercial communications. Under that provision of the treaty the Mackay systems have already applied for a number of wave channels, which, if their request is granted, they intend to use for Pacific, transcontinental, and Atlantic commercial radio services. Such transoceanic and transcontinental means of communications will be used to supplement the wire facilities now possessed. It is obvious that great economies will be effected by the unification of these means of communications under one head.

The imagination may be stirred by the fact that this combination is linking together practically all the peoples of the world, but the economic fact that the combination will tend to increase communications without increasing costs, if not actually with a reduction of them, is probably more pertinent in the present stage of the negotiations.

### Italy Demands Place in Tangier

ONVINCED that nothing short of a share in the administration of Tangier will satisfy Italy, the ambassadorial conference in Paris appears to be prepared to accede to Il Duce's demands. France is desirous of a settlement of this thorny question. Britain has declared that it will accept any modification that may be agreed upon, provided the basis of the international régime is safeguarded. Spain has no wish to act as a stumblingblock to Italian aspirations, although Madrid has been more closely identified perhaps with the régime in that international zone than any other country.

Spain seems to have given up immediate hope of incorporating Tangier in the Spanish zone in Morocco. Had it been able to do so during the troublous times with Abd-el-Krim the situation in the Riff might have taken a different course, for it is no secret that newspaper correspondents in Tangier were in constant touch with the Riffian leader, who established his political headquarters in that city, and whose messengers crossed and recrossed the frontier with amazing ease and frequency.

Italy for the moment has usurped the place of Spain in the news of Tangler. Its admission to the board of governors is a triumph for Italian diplomacy. That the step taken by the powers in inviting it to the conference will remove one of the causes of irritation between the Latin states is not to be gainsaid. Yet it will by no means silence the government at Rome. There are other questions in the background-a definition of the status of Italians in Tunisia, and the delimitation of the southern frontiers of Libya-and until these and other questions are disposed of the interrelations of the Mediterranean states will still have room for improvement.

## New England's Spring Cleaning

TEW ENGLAND, good housekeeper that she is, is tidying up. From the early days of the Old Colony it has been the annual practice of New England, individually and collectively, to set aside a few days or a week for the "spring house cleanin". This is by no means an insinuation that New Englanders overlook dust and dirt during the remainder of the year. Not even the well-known Dutch lady with a stick in her hand is a more energetic dirt chaser than the average New England housewife.

The spring cleaning is something more than an ordinary affair—it is an intensive campaign which continues until "every speck of dust" is driven from the house. Similarly the great outdoors of New England receives attention just as soon as the snow has retired. All over that great area there are scenes of activity in back yards, in parks and playgrounds, and even in "cow pastures" and woodlots. "Just pickin' up a bit" would be the reply of many a householder or farmer in answer to any inquiries of the curious.

For a month or more this tidying-up program will go on. When the tourist season gets under way and motorists from all over the United States find their way into the lake and mountain areas of New England the tidying-up process will have been practically completed and all those communities which make an especial appeal to vacationists will be in their "best bib and tucker" as "spick and span" as they can be made..

## Editorial Notes

According to the report to the Ice Cream Manufacturers' Association 324,000,000 gallons are consumed each year in the United States. This is said to be enough for 20,000,000,000 ice cream cones. Some folks must be eating more than their share!

Men of the United States Navy last year consumed among other things, 4,000,000 pounds of tomatoes, 1,372,000 pounds of peas, and 1,264,-000 pounds of corn. What would the tars of the salt horse and hard tack days say to this?

The air mail is surely winning its way. The plane leaving Boston on the evening of March 22 established the record patronage of seventyeight pounds and twelve ounces, exceeding even the best day in the holiday season.

In spring the average young man's fancy lightly turns to thoughts of getting one of the sprightly new models.

If there is to be a linking of the nations, should it not be with chains that do not chafe?

## Cruising in a Dirigible

As THE first gray streak of dawn appears over the rim of the low-lying eastern hills, the doors of a giant hangar roll slowly away, disclosing a group of several hundred men gathered about a dirigible and patiently awaiting the order for action. Weather permitting was to be located to the results of the ship may be let go. This is an essential feature of lighter-than-air navigation. Were we to pass over a high mountain and find that we are too located to the results of the ship may be let go. This is an essential feature of lighter-than-air navigation. Were we to pass mitting, we are to go aloft this morning for a short training cruise. Out on the flying field, with their instruments, are several weather men. On these depends much in lighter-than-air flying. In the weather station some few hundred yards distant is another group of meteorologists receiving, from the Nation's capital, especially prepared weather reports.

After a short conference between the ship's captain, ground pilot and chief meteorologist, the word is passed on that, as there is no prevailing cross-hangar wind, the ship may be taken safely through the doors facing the west. The ground crew assume their allotted positions and then from the ground pilot comes the order, "Weigh

The guy lines which secure the ship to the cradles are slackened and the ship rises slowly a few feet and is secured temporarily. Now comes the order, "Stand by to walk ship!" Everything is cast loose with the exception of the four docking trolleys. Then, "Walk out!" and the ship moves slowly astern.

The success of this maneuver depends in no small part upon the men with the docking trolleys. These are secured to underground tracks and connected to the ship with steel cables. They are handled by a detail of eight men whose duty it is to keep the trolleys abreast of the ship at all times.

Slowly the ship clears the hangar and in a few minutes is in position to take off. A part of the crew is already on board and when the captain climbs into the control car, the ground pilot is relieved of further responsibility, as is the pilot of a seagoing vessel when the harbor is cleared. The executive officer reports all ready for flight. The captain now communicates orders by ship's telegraph annunciator system to the engineers in their respective gondolas. The orders are checked back to the dial in the control car and we see that the engines are now idling. In a few moments the final order, "Let go port and starboard docking trolleys, let go everything!"

We are now clear of the ground and as the ship noses

gently into the wind, we lurch slightly and then take off into the air. After circling above the field for a few minutes, a course is set, and when the helmsman and elevatorman have brought her on, the signal is relayed to the five

engines for standard speed.

Cruising along in the air, motors droning and ourselves busy with one thing and another, is indeed a delightful experience. Here we are 1000 feet above the earth, and each one is going about his particular duty just as he would in the hangar below. The meteorologist is a particularly interesting person to watch as he lays out his charts, receives data and corrections by radio, and checks each of his charts. After scanning his data he may report the conditions of the upper air currents 200 miles distant in the direction in which we are moving.

The air is now becoming bumpy and this effect is noted

nowhere to better advantage than in the control car. By merely watching the steel cables connecting the car to the ship, one is able to know when the ship finds the air thus. And then the effect is much the same as when flying heavier-than-air craft.

After we get our bearings and become more accustomed to this new experience, we may learn a great deal by looking around and observing. There are seven of us in the control car, but soon two officers will climb the ladder to the keel above and make inspections of the gas bags and fuel tanks along the keelway running the entire length of the ship. Another will inspect each engine to see that everything is functioning properly. After these routine inspections, reports will be made to the captain and notations will be entered in the ship's log.

The helmsman at his station in the most forward part

of the control car is responsible for the lateral motion of the ship, the steering. On the port side of the car is the elevator man, and the wheel at which he is stationed controls the rise and fall. On the starboard side is the chart

over a high mountain and find that we are too low to clear safely, ballast would be released which would lighten the ship instantly, thereby solving the problem. In the rear of the car, in another compartment, is the radio room from which messages are sent and received.

First impressions are often lasting ones, and the magnificent cloud formations which one passes through in these upper strata long remain in memory. One could

hours studying them. Here one might fancy a medieval fortress towering above a long outstretched line of massy clouds resembling the rounded outlines of hills and mountains. Off in the distance is seen in contrast the cirrus clouds, fleecelike and milky white in appearance. And then appears a first view of the broken lines on the horizon in the distance which we know to be the Alleghany Mountain range.

We hover over a city for some time, and what a different view this presents from the air. Black smoke, white smoke, dense clouds of it, and off on the dim horizon a bluish black haze through which our sight cannot penetrate. The navigator is now busy making entries in the log commenting on the sudden change in atmosphere. It is decided to drop 200 or 300 feet so that we may have a better view of the city.

Immediately we note the contrast between city and open country as we circle about. Everything seems to be laid out in perfect geometrical order, and we see city blocks formed into squares, rectangles and triangles, with occasional parks in perfect circles. Tall buildings loom up like so many shafts, and church spires and domes present a most interesting contrast to other more numerous

The course is now set in a northerly direction and the city fades quickly away in the increasing distance. We are flying over open country and the panorama of the mountains behind us is an unending marvel to the eye. The long, sloping hills now give place to broad, flat fields which we recognize as farm lands. Through our glasses we can easily distinguish between the untilled soil and brown stretches of plowed land. Now and again cattle appear dotted about low valleys and pasture lands; after watching closely for a time we can see them moving slowly to and fro. Crops are distinguished by their colors, green and gold. We see numerous ponds and lakes scattered throughout the country that look like sheets

A faint white puff of smoke appears which seems to creep slowly along, stops for a minute, and then continues its progress. We can make out a long black object following behind, and it is now certain that we have a bearing on the railroad. This is an excellent landmark, and by referring to our charts and compass courses we know exactly what part of the country we are flying over. Soon we are over familiar territory and we are able to distinguish roads over which traffic is passing incessantly. The airdrome is sighted shortly and it is well that we are nearing home for, to the northwest, dark nimbus clouds are bursting forth into rain.

The ship is maneuvered over the flying field until a huge letter T is placed on the ground to indicate the direction in which we are to land. We nose into the wind and settle down gradually to within 300 feet of the earth. A line is released in the control car which springs a trap-door in the forward part of the ship over which is a coil of rope 500 feet in length. The ground crew clears away for a moment and then the rope strikes the ground with a thud. Tackles are secured to this line and the crew bring the ship gently to earth. Three of us climb out of the control car so as to lighten ship as much as possible. Shortly before sunset the ship is docked in her berth under the skillful supervision of the ground pilot. A last glance and we see, through the slowly closing doors, the tail surface of the dirigible and the United States ensign being hauled down from the gaff.

## "Is the Organ a Musical Instrument?"

TO THE CHRISTIAN SCIENCE MONITOR:

I read with much interest the article in The Christian Science Monitor by Dr. A. Eaglefield-Hull, entitled, "Is the Organ a Musical Instrument?" In the belief that Dr. Eaglefield-Hull would like to know more about the situation in the United States as regards organs and organists, I would like to mention a few facts:

The organ today is making a stronger appeal than ever before on the people, and we have an ever-growing number of organists who are today responsible for the organ making a direct appeal to the people. Each year sees new auditoriums being built and giant instruments being installed in these buildings and organists of prominence being appointed to preside at them and give the people of the cities the best in literature. When we think of municipal organists we at once think of Edwin H. Lemare, Will C. Macfarlane, Dr. H. J. Stewart, Samue Baldwin and others of the pioneers in the work.

Some of the younger organists who have done a great work in the making of the organ popular in our country are Chandler Goldthwaite at St. Paul, Charles R. Cronham in Portland, Me., Hugh McAmis in San Antonio, Tex., where he has done a great work in bringing the best in music literature to the southwest, Hugo Goodwin today is doing a fine work in St. Paul, Minn., and Arthur H. Turner at Springfield, Mass. Just recently Minneapolis and Memphis, Tenn., have each ordered large instruments for their new auditoriums and there must be a demand for organ recitals to have cities invest in auditoriums and then invest anywhere from \$50,000 to \$100,000 in organs and pay the organists anywhere from \$5000 and more

Today with the increasing demand for new organs in the churches and the advent of the municipal auditorium and organ recitals we find many of our organists "going on tours." Such excellent players as Chandler Goldthwaite, Palmer Christian, Pietro Yon, Clarence Eddy, Harold Gleason, Lynnwood Farnam, Hugh McAmis, Archer Gibson, Firmin Swinnen and many others. Why are they in demand? Because they bring enjoyment to their audiences in their programs. There are many other organists in their respective cities who draw large audiences to their recitals because they too bring enjoy-

ment, not playing above them.

With the modern organ there is no excuse for small audiences, there being no one to blame but the player, for with the large repertoire to draw from and the many transcriptions for the organ, any organist can select a most interesting program and one that will please his audience.

An example of a successful player and one who can draw a crowded church on Sunday afternoons and where there is no service but the recital, the audience depending upon the program, is William E. Zeuch in Boston. Mr. Zeuch offers just one-hour recitals and plays nothing cheap, but offers a program that has something for everyone. Edwin Arthur Kraft of Trinity Cathedral in Cleveland has done much to make the organ popular in arranging many of the most popular orchestral numbers for the organ, and many of his works today are used by our recitalists. And then in San Antonio, Tex., we find Hugh McAmis, one of our younger recitalists who has offered interesting programs twice each week to well-attended audiences at the municipal auditorium. He has the happy faculty of building interesting programs, mak-

attended audiences at the municipal auditorium. He has the happy faculty of building interesting programs, making an organ recital a thing of delight even to those whose knowledge of the instrument is limited.

Tone quality and beauty are today of the outstanding features in the modern organ. High-wind pressures are not abused as in the old days, and with the high-wind pressure much beautiful voicing is obtained. Already

many of the orchestral instruments are perfectly imitated on the organ. The organ today is truly a musical instrument and the organist an artist. Newtonville, Mass. ALFRED THORNDIKE LUARD

## The People's Desire for Peace

TO THE CHRISTIAN SCIENCE MONITOR:

Much has been said by public speakers and writers in regard to the necessity of "educating the public mind," and "awakening the public conscience" in order to bring about the abolition of war and the establishment of peace among the nations of the world.

It has often occurred to the writer that this is, under the circumstances, an unnecessary attitude to take for the accomplishment of the object desired, for the reason that, even if the public conscience is not fully awakened and the public mind is not sufficiently educated in the interests of universal peace, the public is already practically unanimous in its desire for peace and in its opposition to war.

In his recent speech before the Foreign Relations Council in New York, Frank B. Kellogg, United States Secretary of State, seems to agree with this view, for he said:

I do believe that the world is making great strides toward the pacific adjustment of international disputes and that the common people are of one mind in their desire to see the abelition of war as an institution. Certainly the United States should not be backward in promoting this new movement for world peace, and both personally and officially as Secretary of State, I shall always support and advocate the conclusion of appropriate treaties for arbitration, for concillation, and for the renunciation of war.

I have purposely extended the quotation beyond the precise point I wish to make, as the entire quotation cannot be repeated too often. It is the expression of the views and attitude of a leading American statesman, and should be the view and attitude of all statesmen, and when it becomes such, as it should be, for, as Mr. Kellogg says, "the common people are of one mind in their desire to see the abolition of war," then will come the end of warfare.

the end of warfare.

"The common people are of one mind in their desire to see the abolition of war"; therefore the path of the statesman is clearly defined; he has his mandate from the common people; let him use every endeavor to fulfill that mandate and so serve the common people, whose representative he is, to carry out the wishes of the common people. As Abraham Lincoln said, "God must love the common people, He made so many of them."

It is a significant admission Mr. Kellogg has made, and a tremendous responsibility he has placed upon the statesmen.

Buffalo N V.

## Mary Pickford's Articles Enjoyed

TO THE CHRISTIAN SCIENCE MONITOS:

The recent articles on the motion pictures by Mary Pickford have given us much pleasure, and we feel so much better acquainted with the ideals which have made this little artist the beloved of millions of people all over

For years I have admired and loved the simple sweetness and purity of her work on the screen, and as I read her views, I begin to realize why I have loved the ex-pression of such clean, fine ambitions.

The Christian Science Monitor seems to be just the right paper for the articles Miss Pickford is giving to

the world, for that paper surrounds her work with fine, clean articles on national subjects and it too is wholesome, clean and pure.
With sincere gratitude, from another theatrical artist,

though not a motion picture worker. SYLVIA CLARE.
In Vaudeville,
